**Tuesday Seminar**

**Long term records of the Indian monsoon as revealed by 3 recent papers**

**Abstract:**

Three recent papers have tried to reconstruct the Indian monsoon on various timescales and with different resolutions. The first, concentrates on the last two millennia (from north India), the second the last glacial period (south India), and the third (china) covers the full glacial interglacial cycle. In this seminar I will present these papers and discuss their relative merits and demerits. I will also highlight our continuing efforts to fill gaps in the Holocene monsoon records and show how recent ocean records verify our earlier conclusions.

**Speaker: Prof. R. Ramesh**

**GSDN, PRL**

<b>Date</b>	<b>Time</b>	<b>Venue</b>
10-Mar-2015	16:00 hrs	Ground Floor Lecture Hall

**All are invited to attend and participate in discussion**  
Tea at 15:30 hrs

*Neeraj Rastogi, Seminar Secretary, Geosciences Division*
