

## Area Seminar

Title	Can the observed CP asymmetry in $\tau \rightarrow K \pi \nu_{\tau}$ be due to Non-Standard Tensor interactions
Date and Time	28/04/2014 14:30:00
Speaker	Dr. H. Zeen Devi
	IMSc Chennai
Area	Theoretical Physics
Venue	Room No. 469
Abstract	The BABAR collaboration has measured that the decay rate asymmetry in the tau decay modes $\tau \rightarrow K \pi \nu$ has an opposite sign compared to the SM prediction. In this talk we will try to discuss how such a sign difference can be explained if we assume the presence of some non-standard tensor interaction.
