

**Physical Research Laboratory
Ahmedabad**

Space & Atmospheric Sciences Division

Division Seminar

Title: “Beauty of doing science: A rear mirror view”

Speaker: Prof. A. Jayaraman

Former Director, National Atmospheric Research Laboratory (NARL), Gadanki

Date: 12 March 2018

Venue: Ground Floor Lecture Hall

Time: 16:00 hrs

Highlight of the talk:

This presentation is a recollection of my research career in PRL starting from my PhD days. It is also the story of evolution of aerosol studies starting from fundamental measurements to its current relevance to contemporary climate change studies. The beauty of doing science is told in a narrative way, how solving one scientific problem leads to further questions and so on. In parallel it is also the story of evolution of rocket technology in ISRO, from small sounding rockets which could hardly reach 100 km to the present heavy launch vehicles going to outer space.

All interested are welcome.
