

THEORETICAL PHYSICS SEMINAR

---

Title: Degenerate Supersymmetry

Speaker: Dr. Ketan Patel, INFN Padova

Date/Time/Venue: 2nd November (Monday) / 2:30 PM/ Room No. 469

ABSTRACT

---

A degenerate supersymmetric particle spectrum can escape constraints from flavor physics and at the same time evade limits from the direct searches. I will discuss various indirect constraints and phenomenological aspects of such a possibility.

All are welcome to attend
