A THESIS
SUBMITTED TO THE GUJARAT UNIVERSITY
FOR THE DEGREE OF
DOCTOR OF PHILOSOPHY

FEBRUARY 1992

DEDICATED TO

My Parents

CERTIFICATE

I hereby declare that the work presented in this thesis is original and has not formed the basis for the award of any degree or diploma by any University or Institution.

The human mind is not capable of grasping the universe. We are like a little child entering a huge library. The walls are covered to the ceilings with books in many different tongues. The child knows that someone must have written these books. It does not know who or how. It does not understand the languages in which they are written. But the child notes a definite plan in the arrangement of books—a mysterious order which it does not comprehend, but only dimly suspects.

A.Einstein

Acknowledgements	vi
Research Publications	ix
Abstract	x
1 Introduction	1
1.1 A Brief History of Coronal Science	1
1.2 Coronal Electron Density	4
1.3 Coronal Structure	5
1.4 Coronal Temperature	7
1.5 Coronal Velocity Fields	9
1.6 Coronal Emission	14
1.6.1 Coronal Ionization	14

1.6.2	Coronal Excitation	17
1.6.3	Coronal Green Line	18
	Excitation Mechanism of Green Line	21
1.7	Coronal Magnetic Fields	22
1.7.1	Solar Dynamo	24
1.8	Coronal Heating Mechanisms	25
	Energy Requirements:	26
1.8.1	Acoustic Heating	27
1.8.2	Electrodynamic Heating	28
	MHD Waves	29
	Heating by Currents	31
1.9	Coronal Modelling	32
1.10	Solar Cycle	34
1.11	Importance of Coronal Studies	37
1.12	Relevance and Importance of the present study	38
2	Data Reduction Techniques	41
2.1	Fabry-Pérot Interferometer	41

2.2	Observations	45
2.3	Data Reduction	49
2.3.1	Photo Digitizing System	50
2.3.2	Analysis	53
i)	Determination of the Reference Point for Scanning	53
ii)	Matching the Frames	54
iii)	Obtaining the Intensity Profiles	55
iv)	Wavelength Conversion	56
3	Wing Intensity in Fabry-Pérot fringes	59
3.1	Factors which affect the Wing Intensity	60
3.1.1	Effect of Continuum Radiation in nearby Wavelengths	63
3.2	Presence of Discrete Components in the Corona	68
4	Velocity fields in the Solar Corona	75
4.1	Line Profile Studies-Gross Behavior	77
4.2	Line Profile Analysis-A Detailed Study	89
4.3	Modelling of the Coronal Green Line Profile	95
4.4	Discussion	104

5 Studies on the Coronal Green Line	111
5.1 Excitation Mechanism of the Coronal Green Line	112
5.1.1 Observation and Data Analysis	113
5.1.2 Results and Discussion	114
5.2 Line to Continuum Intensity Ratio	132
6 A Fabry-Pérot Interferometric Study Of The Orion Nebula	135
6.1 Introduction	135
6.1.1 Interstellar Medium	136
6.1.2 Orion Nebula	139
6.1.3 The Orion Complex and Star Formation	142
6.2 Kinematics of Orion Nebula	143
6.3 Observation and Data reduction	147
6.4 Results and Discussions	152
7 Summary and Conclusions	158
7.1 The Emission Line Profile Studies	159
Future Studies:	162
7.2 Studies On The Coronal Green Line	164

Future Studies	165
7.3 Studies on the Orion Nebula (M42)	165
Future Studies	166
