STUDIES IN EQUATORIAL AERONOMY

A THESIS  
SUBMITTED FOR THE DEGREE OF  
DOCTOR OF PHILOSOPHY  
OF THE

GUJARAT UNIVERSITY

BY  
HAR SURENDRA SAHA I SINHA

STATEMENT	...	i
ACKNOWLEDGEMENTS	...	iv
CONTENTS	...	viii
CHAPTER I	INTRODUCTION	1
CHAPTER II	GENERATION MECHANISMS OF IRREGULARITIES	47
CHAPTER III	LANGMUIR PROBE, INSTRUMENTATION AND DATA ANALYSIS	72
CHAPTER IV	RESULTS DURING PERIODS OF NORMAL ELECTROJET	117
CHAPTER V	RESULTS DURING PERIODS OF COUNTER ELECTROJET	143
CHAPTER VI	DISCUSSION AND CONCLUSIONS	153
REFERENCES	...	179

CHAPTER I	<u>INTRODUCTION</u>	1-46
1.1	Equatorial Electrojet	3
1.1.1	Conductivities in the Ionosphere	5
1.1.2	Models of the Equatorial Electrojet	9
1.2	Counter Electrojet	17
1.3	D and E-region Irregularities	23
1.3.1	Observational Results of Ionization Irregularities from Ground Based Studies	23
1.3.1.1	Studies with Ionosonde	23
1.3.1.2	Studies with V.H.F. Forward and Backscatter Radar	25
	a) Electrojet Irregularities	25
	b) Irregularities due to Neutral Turbulence	34
1.3.2	Observational Results of Ionization Irregularities from Rocket Borne Studies	36
CHAPTER II	<u>GENERATION MECHANISMS OF IRREGULARITIES</u>	47-71
2.1	Theories of Cross-field Instability	47
2.1.1	Linear Theories	47
2.1.2	Non-linear Theories	54
2.2	Neutral Turbulence	61
2.2.1	General Nature of Turbulence	61
2.2.2	Regions of Turbulence in the Ionosphere	66

2.2.3	Electron Density Fluctuations Due to Fluctuations in Neutral Density	68
2.2.4	Electron Density Fluctuations Due to Turbulent Mixing	69

## CHAPTER III

LANGMUIR PROBE, INSTRUMENTATION  
AND DATA ANALYSIS

72-116

3.1	Basic Principle of Langmuir Probe	72
3.1.1	Behaviour of Probe at Different Potentials	73
3.1.2	Different Versions of Langmuir Probe Used by Various Workers	78
3.1.3	Regions of Applicability	81
3.1.4	Sensor of the Langmuir Probe	82
3.1.5	Reference Electrode	83
3.1.6	Floating Potential	84
3.2	Proportionality Between the Probe Current and Electron Density	85
3.3	Irregularity Measurements with Langmuir Probe	87
3.4	Instrumentation	88
3.4.1	Power Supply Regulator	91
3.4.2	Electrometer Amplifier	93
3.4.3	Sweep Circuit	98
3.4.4	High Frequency Noise Amplifier	101
3.4.5	Duct Amplifier	102
3.5	Data Analysis	105

3.5.1	Determination of Electron Density	107
3.5.2	Analysis of 30-300 Meter Scalesizes	109
	a) Fourier Transform Technique	109
	b) Zero Crossing Technique for Most Prominent Scalesize	112
3.5.3	Analysis of 1-15 Meter Irregularities	114
CHAPTER IV	<u>RESULTS DURING PERIODS OF NORMAL ELECTROJET</u>	117-142
4.1	General Nature of Electron Density Profile During Different Times of the Day	118
4.2	General Nature of Electron Density Gradients During Different Times of the Day	120
4.3	Ionization Irregularities Produced Through Cross-field Instability Mechanism	123
4.3.1	Irregularities in 30-300 Meter Scalesize Range	123
	a) Region of Occurrence	123
	b) Shape of Irregularities	125
	c) Spectrum of Irregularities	126
	d) Amplitude of Typical Scalesizes	128
	e) Variation of Scalesize with Altitude	129
4.3.2	Irregularities in 1-15 Meter Scalesize Range	130

	a) Region of Occurrence	130
	b) Spectrum of Irregularities	132
4.4	Ionization Irregularities Produced Through Neutral Turbulence Mechanism	136
4.4.1	Irregularities in 30-300 meter Scalesize Range	137
4.4.2	Irregularities in 1-15 meter Scalesize Range	140
CHAPTER V	<u>RESULTS DURING PERIODS OF COUNTER ELECTROJET</u>	143-152
5.1	Experimental Results During Counter Electrojet	143
5.1.1	Electron Density and its Gradient	145
5.1.2	Irregularities Due to Cross-field Instability	146
5.1.3	Irregularities Due to Neutral Turbulence	147
5.1.4	Irregularities Due to Streaming Instability	151
5.1.5	Irregularities Due to Unknown Mechanism	152
CHAPTER VI	<u>DISCUSSION AND CONCLUSIONS</u>	153-178
6.1	Irregularities Due to Cross-field Mechanism	153
6.1.1	30-300 Meter CF Irregularities During Normal Electrojet	153
6.1.2	30-300 Meter CF Irregularities During Counter Electrojet	161

6.1.3	1-15 Meter CF Irregularities During Normal Electrojet	162
6.2	Irregularities Produced by Neutral Turbulence Mechanism	169
6.3	Irregularities Produced by Unknown Mechanism	172
6.4	Conclusions	173
