CHAPTER I: AN INTRODUCTION TO PLANETARY NEBULAE

1.1	Introduction	1
1.2	The early years of PNe studies	2
1.3	The progenitor stars of PNe and their evolution	3
1.4	Temperature of the central stars of PNe	8
1.5	Mechanisms for PNe formation	11
1.5.1	PNe formation due to dynamical and pulsational instabilities	11
1.5.2	The interacting-winds mechanism for PNe formation	13
1.6	The morphological forms of PNe	15
1.7	Mechanisms for the shaping of PNe envelopes	16
1.8	The relevance of kinematic studies	19
1.9	Physical processes in PNe	20
1.9.1	The emission line spectrum of PNe	21
1.9.2	The continuum radiation from PNe	25
1.9.3	The determination of electron temperatures from emission lines	26
1.9.4	Electron density measurements from emission lines	27
1.10	Aims and scope of the study	28

CHAPTER II: A FABRY-PEROT SPECTROMETER FOR THE KINEMATIC STUDIES OF PLANETARY NEBULAE

2.1	Introduction	29
2.2	Choice of the spectrometer and its advantages	30

2.3	Basic theory and definitions	31
2.4	Design and fabrication	35
2.4.1	Choice of the etalon parameters	35
2.4.2	Optical system	39
2.4.3	Interference filters	40
2.4.4	Detection system	41
2.4.5	Scanning of the etalon	42
2.4.6	Data acquisition	44
2.5	Instrument profile and performance	45
2.6	Observations and data collection	52
2.7	Data analysis and reduction	53
2.8	Errors and their estimates	54
2.8.1	Stability of the F.P. etalons	54
2.8.2	Errors in data reduction	56
2.9	Pressure scanning F.P.S	57

CHAPTER III: KINEMATIC OBSERVATIONS OF SELECTED PLANETARY NEBULAE

3.1	Introduction	59
3.2	Kinematic information from PNe line profiles	60
3.3	Observations of selected planetary nebulae	61
3.4	IC 4593	64
3.5	NGC 6153	74
3.6	IC 4406	83
3.7	NGC 2818	86
3.7.1	Nebular parameters of NGC 2818	90
3.7.1a	Distance to the nebula	90
3.7.1b	Filling factor and electron density	91
3.7.1c	Mass of the nebula	93
3.8	NGC 6302	94

CHAPTER IV: SPATIO-KINEMATIC MODELS FOR THE OBSERVED PLANETARY NEBULAE

4.1	Introduction	101
4.2	NGC 2440	101
4.2.1	Morphology and physical properties	101
4.2.2	Previous kinematic studies of NGC 2440	104
4.2.3	Observations on NGC 2440	106
4.2.4	Kinematic results in NGC 2440	108
4.2.5	Discussion of the results	113
4.2.6	A spatio-kinematic model for NGC 2440	114
4.2.7	Conclusions regarding the kinematics of NGC 2440	125
4.2.8	Formation mechanism of NGC 2440	126
4.3	NGC 2346	127
4.3.1	Introduction	127
4.3.2	Previous kinematic studies of NGC 2346	129
4.3.3	Observations and results	130
4.3.4	Kinematic results in NGC 2346	130
4.3.5	Spatio-kinematics and intensity distribution in NGC 2346	137
4.3.6	A morphological model for NGC 2346	138
4.3.7	Conclusions	142
4.4	NGC 1535	143
4.4.1	Morphology and physical properties	143
4.4.2	Previous kinematic studies of NGC 1535	145
4.4.3	Observations on NGC 1535	147
4.4.4	Model emission line profiles in NGC 1535	147
4.4.5	Results from the model	155
4.4.6	Conclusions on the kinematics and morphology of NGC 1535	160
4.4.7	Formation mechanism of NGC 1535	160
4.5	NGC 5882	161
4.6	NGC 650/1	167
4.6.1	Spatio-kinematics and formation mechanism for NGC 650/1	173

CHAPTER V: A PHYSICAL MECHANISM FOR THE STRUCTURAL DEVELOPMENT OF PLANETARY NEBULAE ENVELOPES

5.1	Introduction	176
5.2	Mechanisms for the ejection and morphological evolution of PNe envelopes	177
5.2.1	The effect of double shell flashes on PNe formation	177
5.2.2	The effect of stellar rotation on the evolution of PNe shells	179
5.2.3	Shaping of PNe envelopes by the Interacting-winds mechanism	180
5.3	Mechanisms vs Observations - a case for a new model	182
5.4	A model for the structural development of PNe envelopes	184
5.4.1	Formation of hour-glass PNe	195
5.5	Discussions	204
5.6	Possible formation mechanisms for some of the observed PNe	207
5.7	Conclusions	211

CHAPTER VI: SUMMARY AND SCOPE FOR FUTURE WORK

6.1	Summary	213
6.2	Scope for future work	218
