## PHOTOMETRIC STUDIES OF STARBURST GALAXIES

A Thesis Submitted to

The Gujarat University

in partial fulfillment

for

THE DEGREE OF DOCTOR OF PHILOSOPHY

in

PHYSICS

by

APARNA A. CHITRE

Acknowledgements	iv
List of Tables	v
List of Figures	vi
<b>1 Introduction</b>	<b>1</b>
1.1 The Starburst Phenomena . . . . .	2
1.2 Triggers of the starburst . . . . .	3
1.3 Optical studies of starburst galaxies . . . . .	5
1.4 Multiwavelength studies . . . . .	6
1.5 Modelling studies . . . . .	8
1.6 This investigation . . . . .	9
<b>2 Observations and Data Reduction</b>	<b>11</b>
2.1 The sample . . . . .	12
2.2 Instruments . . . . .	12
2.3 Observing procedure . . . . .	15
2.4 Notes on individual galaxies . . . . .	15
2.5 Data Reduction . . . . .	18
2.6 Photometric Calibrations . . . . .	20
2.7 Interstellar Extinction and Inclination Corrections . . . . .	23
2.8 Photometry limits . . . . .	23
<b>3 Optical morphology</b>	<b>25</b>
3.1 Optical Morphology . . . . .	26
3.1.1 Morphology of the sample objects . . . . .	28

3.2	Colour Maps . . . . .	29
3.2.1	Construction and interpretation of colour maps . . . . .	30
3.3	H $\alpha$ images . . . . .	31
3.3.1	Spatial distribution of star forming regions . . . . .	31
3.3.2	Pseudo equivalent widths of H $\alpha$ . . . . .	49
3.4	Individual galaxies . . . . .	54
3.4.1	S0's and E's . . . . .	54
3.4.2	Spirals . . . . .	62
3.4.3	Irregulars and Peculiars . . . . .	66
3.5	Discussion and Conclusions . . . . .	69
<b>4</b>	<b>Structural properties . . . . .</b>	<b>72</b>
4.1	Luminosity profiles of galaxies . . . . .	73
4.2	Ellipse fitting . . . . .	74
4.3	Colour index profiles . . . . .	76
4.4	Detection of fine structure . . . . .	76
4.4.1	Model construction and residual maps . . . . .	77
4.5	Results of isophotal analysis . . . . .	78
4.5.1	Individual galaxies . . . . .	80
4.5.2	Discussion . . . . .	92
4.6	Structural parameters . . . . .	95
4.6.1	Half-light Radius . . . . .	95
4.6.2	Disk scale lengths and central disk brightnesses . . . . .	96
4.6.3	Comparison with other samples . . . . .	98
4.7	Global properties . . . . .	101
4.8	Conclusions . . . . .	103
<b>5</b>	<b>Models of starburst galaxies</b>	<b>122</b>
5.1	Historical Perspective . . . . .	123
5.2	Model Construction . . . . .	124
5.2.1	Pure burst models . . . . .	124

5.2.2	Composite populations . . . . .	126
5.2.3	Model A : Passively evolving population . . . . .	126
5.2.4	Model B : Actively evolving population . . . . .	127
5.3	Comparison with observed colours. . . . .	129
5.4	Conclusions . . . . .	133
<b>6</b>	<b>Conclusions and scope for future work</b>	<b>134</b>
6.0.1	Future work . . . . .	135
<b>References</b>		<b>136</b>
