

FERMION MASSES AND MIXINGS

Debajyoti Choudhury

Theory Group, Physical Research Laboratory

Navrangpura, Ahmedabad – 380 009, India.

A Thesis Submitted to

The Maharaja Sayajirao University of Baroda

for the Degree of

Doctor of Philosophy

in

Physics

May 1991

043

B14591

Contents

Acknowledgements	iv
Research Publications	v
Synopsis	vi
1 Introduction	1
2 The Standard Model: Some Issues Revisited	5
2.1 The Standard Model	5
2.2 Quark Masses	11
2.3 CP Violation and Neutral Meson Systems	14
2.3.1 The $K^0-\overline{K}^0$ system:	15
2.3.2 Sources of CP Violation	20
2.3.3 The $B_d^0-\overline{B}_d^0$ system	22
3 Quark Masses And Mixings	24
3.1 Models for Quark Masses and Mixings	24
3.1.1 Stech Model:	24

3.1.2	The Fritzsich Model:	26
3.1.3	Fritzsich-Shin Model:	29
3.1.4	Fritzsich-Stech model:	29
3.2	Validity of Models	29
3.2.1	The Stech Model : Consistency Check	30
3.2.2	The Fritzsich Model: Consistency Check	31
3.2.3	Fritzsich-Shin Model: Consistency Check	32
3.2.4	Fritzsich-Stech model: Consistency Check	33
3.2.5	Conclusions	33
3.3	A Model Independent Analysis	33
3.3.1	The two generation limit:	35
3.3.2	Back to three generations:	35
3.3.3	The off-diagonal terms:	38
3.3.4	Models as special cases of the general form:	39
3.3.5	Conclusions	41
4	Neutrino Masses and some Consequences	43
4.1	Neutrino Masses	43
4.1.1	Neutrino Mixing and Oscillations	46
4.1.2	Neutrinoless Double Beta Decay	50
4.2	Naturally Light Majorana Neutrinos with no Neutrinoless Double Beta Decay	51
5	On Some Exotic Neutrino Phenomenology	58

5.1	Large Magnetic Moment for Nearly Massless Neutrinos	59
5.2	Gravitational Helicity Flip of Neutrinos	65
5.3	Model for the 17 <i>keV</i> Neutrino	69
6	Summary	75
	Bibliography	79
