

Self-imaging and its applications to multimode interference (MMI) and photonic bandgap devices

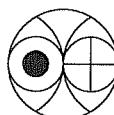

A thesis submitted to
Nirma University

for the degree of
Doctor of Philosophy in Physics

by
Subimal Deb

under the Supervision of
Prof. Jagannath Banerji

List of Figures	v
Acknowledgement	xiii
Abstract	xv
1 Introduction	1
1.1 Self-imaging	2
1.1.1 Self-imaging in free space	3
1.1.2 Self-imaging in waveguides	4
1.2 Conventional MMI devices	5
1.3 Photonic band gap structures	9
1.3.1 Methods for analysing dielectric structures	11
1.3.2 Plane wave expansion	12
1.3.3 Order-N method	13
1.3.4 Characteristic matrix approach	15
1.4 Conclusion	19
2 A Dual Case I waveguide resonator with variable reflectivity mirrors	20

2.1	Introduction	20
2.2	Theory	22
2.2.1	Waveguide Modes	22
2.2.2	Self- Imaging and beam splitting	24
2.3	Previous design and its working principle	26
2.4	Present Design and its working principle	27
2.5	Results and Discussion	30
2.6	Conclusion	36
3	Critical coupling at oblique incidence	38
3.1	Introduction	38
3.2	Mathematical Formulation	41
3.3	Numerical Results and Discussions	45
3.4	Conclusions	50
4	Photonic crystal waveguide interferometer with $\sim \lambda/1000$ fringe spacing	51
4.1	Introduction	51
4.2	Previous work	52
4.2.1	The experiment of Ovchinnikov and Pfau (year 2001) .	52
4.2.2	The design of Jenkins et. al. (year 2008)	53
4.3	The present design	61
4.4	Method used	62
4.4.1	Determining the propagation constants	63
4.4.2	Extraction of the guided modes	65

4.5 Results	67
4.6 Conclusion	72
5 Conclusion and future prospects	73
Bibliography	75
