

# MULTI-WAVELENGTH STUDY OF THE MILKY WAY GALAXY

A thesis submitted to  
Gujarat University  
for the degree of  
Doctor of Philosophy in Physics

By  
SHASHIKIRAN GANESH

Astronomy & Astrophysics Division  
Physical Research Laboratory  
Ahmedabad  
INDIA  
October 2009

# CONTENTS

1	INTRODUCTION	1
1.1	Historical developments in Galactic research	1
1.2	Infrared surveys of the Milky Way	4
1.3	Infrared stellar populations	6
1.3.1	Giants of the red clump	7
1.4	Interstellar extinction	8
1.5	Optical polarimetry	9
1.6	Layout of the thesis	11
2	INTERSTELLAR EXTINCTION TOWARDS THE GALACTIC BULGE	13
2.1	Introduction	13
2.2	The GLIMPSE-II survey	14
2.3	Ext. coeff. ( $A_\lambda/A_V$ ) for the 2MASS filters	15
2.3.1	Uncertainties in the extinction coefficient determination	18
2.4	CMDs & isochrones	20
2.5	Extinction determination	22
2.5.1	GLIMPSE-II	22
2.5.2	2MASS	23
2.6	Uncertainties in the extinction map	23
2.7	Results	26
2.7.1	Extinction coefficients and the extinction law	26
2.7.2	Extinction map	28
2.8	Conclusions	31
3	A FIELD IN THE NUCLEAR BULGE	32
3.1	Introduction	32
3.2	The Survey	32
3.3	Observations	33
3.4	Data Reduction and Analysis	34
3.5	Images of the Galactic Centre	34
3.6	A field towards $\ell = 0.0, b = 1.0$	35
3.6.1	CMDs : RGB isochrones, red clump distances	36

3.6.2	Extinction determination and comparison with 2MASS	38
3.6.3	Distance histogram and the width of the nuclear bulge	39
3.6.4	Absolute CMD	40
3.6.5	Catalogue of stars in this field	42
3.7	Conclusions	43
4	STELLAR POPULATIONS IN AN ISOGAL FIELD IN THE GALACTIC DISC	44
4.1	Introduction	44
4.2	The data set	45
4.2.1	ISOGAL observations and data reduction	45
4.2.2	Cross identification with other surveys	49
4.3	Accuracy of ISOGAL data	53
4.3.1	Comparison with GLIMPSE data	53
4.3.2	Repeated 15 $\mu$ m ISOGAL observations	56
4.4	Interstellar extinction and distance scale	57
4.4.1	Local value of optical extinction from main-sequence stars	57
4.4.2	Near-infrared CMDs of red giants, extinction, and distance scales	57
4.4.3	Variations in extinction across the field and correlation with CO	64
4.4.4	Extinction law at 7 and 15 $\mu$ m and in the GLIMPSE bands	64
4.5	Nature of sources	65
4.5.1	AGB stars and mass loss	69
4.5.2	Candidate young stellar objects	72
4.6	Conclusion	75
4.7	Readme : Flag description	77
4.8	Multi-wavelength catalogue for LN45 field	79
4.9	CMDs by survey wavelengths	80
4.10	CC diagrams for Ext. Coeffs.	81
4.11	CMDs for diff. b	83
5	INTERSTELLAR EXTINCTION AND POLARISATION OF INFRARED SOURCES TOWARDS L97 FIELD	88
5.1	The L97 field	88
5.2	Optical polarimetry	90

5.2.1	Principle of operation	93
5.2.2	Evolution of the control system	95
5.2.3	New system - Hardware	96
5.2.4	System - software	103
5.3	Observations with 1.2m Mount Abu telescope	108
5.3.1	Observations	108
5.3.2	Calibration observations	109
5.4	Results & discussion	109
5.4.1	Infrared diagnostic diagrams	111
5.4.2	Distance histograms	115
5.4.3	Optical polarimetric results	115
5.5	Conclusion	123
6	SUMMARY & FUTURE COURSE	124
6.1	Summary	124
6.2	Future course	127
A	CATALOGUE FOR THE LN45 FIELD	128
	BIBLIOGRAPHY	141
