

Fractional Revivals in Quantum Systems and their Applications

A Thesis Submitted to
NIRMA UNIVERSITY

for the degree of
Doctor of Philosophy in PHYSICS

BY
Suranjana Ghosh

पुस्तकालय THE LIBRARY
शोलिक अनुसंधान प्रयोगशाला
PHYSICAL RESEARCH LABORATORY
नवरामपुरा, अहमदाबाद-380 009.
RAVRANGPURA, AHMEDABAD-380 009
Under the Supervision of

Dr. Jagannath Banerji

THEORETICAL PHYSICS DIVISION
PHYSICAL RESEARCH LABORATORY,
AHMEDABAD - 380 009, INDIA

Abstract	ix
1 Introduction	1
1.1 Introduction	1
1.1.1 Revival and fractional revivals	2
1.1.2 Specific cases of fractional revivals	4
1.1.3 Autocorrelation function	5
1.2 Atomic and molecular systems	6
1.2.1 Rydberg atom	6
1.2.2 Diatomic molecular system	6
1.3 Coherent state	11
1.4 Phase space and Quasi-probability distribution	12
1.4.1 Wigner distribution	13
1.4.2 Mesoscopic superposition	15
1.4.3 Sub-Planck scale structure and Decoherence	16
1.5 Two time scales: revival and fractional revivals	17
1.5.1 Generalization of one time scale to two time scales	18
1.6 Non stationary signal analysis	21
1.6.1 Fourier Transform:	22
1.6.2 Short Time Fourier Transform:	22
1.6.3 Wavelet Transform	23
2 Mesoscopic superposition and sub-Planck scale structure in molecular wave packets	25
2.1 Introduction	25

2.2	Symmetry generation and Perelomov coherent state of the Morse potential	26
2.2.1	Morse potential	26
2.2.2	Morse Perelomov coherent state	28
2.3	Coherent state wave packet time evolution in different representation	30
2.3.1	Autocorrelation function	30
2.3.2	Quantum carpet structure	31
2.3.3	Co-ordinate representation	32
2.4	Wigner distribution of coherent state wave packet at different times	33
2.4.1	Schrödinger cat states	35
2.4.2	Sub-Planck scale structure	36
3	The role of ro-vibrational coupling in the revival dynamics of diatomic molecular wave packets	40
3.1	Introduction	40
3.2	Theory	41
3.3	Results and Discussion	44
3.3.1	Wave packet dynamics for $\alpha > 1, \gamma \gg \bar{j}, \bar{\nu}$	44
3.3.2	Wave packet dynamics for $\alpha > 1, \gamma \sim \bar{j}, \bar{\nu}$	47
3.4	Analysis by autocorrelation function	52
3.5	Conclusion and applications	56
4	A time frequency analysis of wave packet fractional revivals	57
4.1	Introduction	57
4.2	Fractional Revivals of a Rydberg wave packet	59
4.3	Time-Frequency Analysis	61
4.4	Fractional Revivals of a diatomic molecular system	65
4.5	Advantages of the time-frequency representation	66
4.6	Conclusion	69
