

**METHODOLOGICAL ASPECTS OF  
RADIATION DOSIMETRY OF NATURAL RADIATION  
ENVIRONMENT USING LUMINESCENCE TECHNIQUES:  
NEW MINERALS AND APPLICATIONS**

A thesis submitted to  
The Gujarat University, Ahmedabad  
For the award of the degree of  
Doctor of Philosophy  
In  
Physics

By  
**YOGESH CHAND NAGAR**  
**Physical Research Laboratory,**  
**Ahmedabad– 380 009,**  
**INDIA**

**February 2007**

## Thesis contents

	Page
<b>Abstract.....</b>	iv
<b>Acknowledgement.....</b>	vii
<b>List of Figures.....</b>	xiii
<b>List of Tables.....</b>	xvi
<b>Chapter 1: Introduction.....</b>	1–23
1.1 Introduction .....	1
1.2 Evaporite deposits and their significance.....	2
1.2.1 Gypsum.....	3
1.3 Methods for chronometry of evaporites.....	5
1.3.1 U-series isochron dating.....	5
1.3.2 Cosmogenic radionuclide method ( $^{36}\text{Cl}$ ).....	7
1.4 Luminescence dating.....	8
1.4.1 Basic principles.....	8
1.4.2 Luminescence dating.....	10
1.4.3 The age equation.....	13
1.4.4 Evaluation of $D_e$ .....	14
1.4.5 Dose rate.....	14
1.4.6 TL/OSL of Quartz and Feldspar.....	14
1.5 ESR dating.....	15
1.5.1 ESR.....	15
1.5.2 ESR dating.....	19
1.5.2.1 The age equation.....	19
1.5.2.2 Basic assumptions.....	19
1.5.2.3 Paleodose ( $D_e$ ) measurement.....	20
1.6 Objective and scope of the Thesis.....	20
1.7 Chapters wise details.....	22
<b>Chapter 2: Experimental Procedures and Protocols .....</b>	<b>24–60</b>
2.1 Dating techniques and sample preparation.....	24

2.1.1 Fine grain technique.....	25
2.1.2 Coarse grain technique.....	25
2.2 Normalization procedures.....	26
2.2.1 Weight normalization.....	26
2.2.2 Zero glow normalization (ZGN).....	27
2.2.3 Short shine normalization.....	27
2.3 Luminescence experimental.....	27
2.3.1 Photomultiplier Tube.....	28
2.3.2 Filters.....	28
2.3.3 Stimulation source.....	28
2.3.4 Irradiation.....	31
2.4 D <sub>e</sub> Measurements.....	32
2.4.1 Multiple aliquot additive dose method (MAAD).....	32
2.4.2 Single aliquot regeneration method (SAR).....	32
2.4.3 Experimental details.....	37
2.4.4 Selection of paleodose for age estimation methods.....	37
2.4.5 Dose visualization methods.....	39
2.4.5.1 Histogram.....	39
2.4.5.2 Radial plot.....	39
2.4.6 Preheat plateau.....	41
2.4.7 Dose recovery test.....	41
2.5 Dose rate estimation.....	42
2.6 a-value.....	47
2.7 ESR: experimental and methods.....	48
2.7.1 ESR Spectrometer.....	48
2.7.1.1 WINEPR/SIMFONIA.....	51
2.7.2 ESR spectrum and parameters.....	52
2.7.3 Methodology.....	55
2.7.3.1 Paleodose measurement: Single sample additive dose method.....	55
2.7.3.2 Dose rate estimation.....	55
2.7.3.3 Measurement techniques.....	55
2.7.3.4 Spectrum readout.....	58
2.7.4 Experimental details.....	60
2.8 Estimation of errors.....	60

<b>Chapter 3: Material Characterization.....</b>	61–79
3.1 Introduction.....	61
3.2 Studies on the loss of water.....	62
3.3 X-ray diffraction (XRD) .....	64
3.4 Fourier Transform Infrared (FT-IR) spectroscopy .....	66
3.5 Luminescence characterization.....	73
3.5.1 Luminescence studies.....	73
3.5.2 Dose response.....	76
3.6 Conclusions.....	79
<b>Chapter 4: Dating of gypsum: Results-I (Thar Desert, India).....</b>	80–127
4.1 Introduction.....	80
4.1.1 Gypsum in Thar.....	82
4.2 Direct dating of gypsum: ESR.....	84
4.2.1 ESR dating of gypsum present status.....	84
4.2.2 Present work: Results.....	85
4.3 Indirect dating: Luminescence.....	94
4.4 Discussion.....	110
4.5 Conclusions.....	114
Appendix A.....	115
<b>Chapter 5: Dating of gypsum: Results-II (White Sands, New Mexico).....</b>	128–154
5.1 Introduction.....	128
5.2 Chronology.....	129
5.2.1 Direct dating: ESR dating .....	129
5.2.1.1 Discussion and conclusions.....	134
5.2.2 Indirect dating: Luminescence dating.....	137
5.2.2.1 Extraction of quartz by hydrochloric acid and results.....	137
5.3 Discussion .....	148
5.4 Conclusions.....	150
Appendix B.....	151

<b>Chapter 6: Conclusions and Future Perspectives.....</b>	<b>155–162</b>
6.1 Conclusions.....	155
6.2 Future perspectives.....	159
