

# **Role of the Ocean in the Global Carbon Cycle**

**Thesis submitted to**

**The Maharaja Sayajirao University of Baroda  
Vadodara, India**

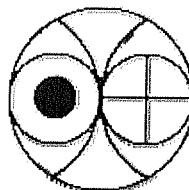

**For the degree of**

**Doctor of Philosophy in Geology**

**By**

**Satya Prakash**

**April, 2008**

**Planetary and Geosciences Division  
Physical Research Laboratory,  
Navrangpura, Ahmedabad-380 009,  
India**

List of tables.....	iv-v
List of figures.....	vi-ix
<b>Chapter 1      Introduction</b>	<b>1-17</b>
1.1      Marine Primary Production.....	2
1.2      Estimation of new and regenerated productivity.....	5
1.2.1      Different methods for measuring new and export production.....	5
1.2.2      Merits of using nitrogen as a tracer for estimating new and regenerated productivity.....	6
1.3      N-uptake rates and <i>f</i> -ratios in different parts of the world's ocean.....	6
1.4      Indian Ocean and its biogeochemical properties.....	9
1.5      Carbon budget of the Indian Ocean.....	12
1.6      Previous $^{15}\text{N}$ based studies in different parts of Indian Ocean.....	13
1.7      Scope of the present work.....	14
1.8      Outline of the thesis.....	15
1.9      Scientific questions addressed.....	16
<b>Chapter 2      Sampling Location, Seasons and Experimental Techniques</b>	<b>18-46</b>
2.1      Introduction.....	19
2.1      Ocean colour studies.....	20
2.2.1      Analysis of ocean colour data.....	20
2.2.2      Study Area.....	21
2.2.3      Limitation of ocean remote sensing.....	22
2.3      Primary Production.....	22
2.3.1      Arabian Sea.....	23
2.3.2      Equatorial Indian Ocean.....	26
2.3.3      Southern Indian Ocean.....	28
2.4      Experimental Procedures.....	29
2.4.1      Sample collection.....	29
2.4.2      Tracer Preparation.....	31
2.4.3      Ambient nutrient measurement.....	31
2.4.4      Addition of tracers.....	32
2.4.5      Incubation.....	32
2.4.6      Filtration.....	33

<b>2.5</b>	Instruments and analysis.....	34
<b>2.5.1</b>	Instrumentation.....	35
<b>2.5.2</b>	Con-flo.....	36
<b>2.5.3</b>	Mass spectrometer.....	36
<b>2.5.4</b>	Calibration of mass spectrometer.....	37
<b>2.5.5</b>	Estimation of uptake rate.....	40
<b>2.5.6</b>	Equation used for the estimation of uptake rates.....	41
<b>2.6</b>	Iron experiment.....	42
<b>2.6.1</b>	Experimental procedure.....	43
<b>2.6.2</b>	Iron tracer preparation.....	45
<b>2.6.3</b>	Chlorophyll measurement.....	45
<b>2.7</b>	Quality Control.....	46

## **Chapter 3      The Northeastern Arabian Sea                  47-88**

<b>3.1</b>	Introduction.....	48
<b>3.2</b>	Remote sensing studies.....	51
<b>3.3</b>	Chlorophyll- $\alpha$ , nutrients and physical parameters during February-March 2004 in the northwestern Arabian Sea.....	59
<b>3.3.1</b>	Chlorophyll- $\alpha$ .....	59
<b>3.3.2</b>	Nutrients.....	61
<b>3.3.3</b>	Hydrographic conditions.....	63
<b>3.4</b>	$^{15}\text{N}$ based Productivity study during the late winter monsoon (Feb.-March 2004).....	65
<b>3.4.1</b>	Total Production.....	65
<b>3.4.2</b>	New Production.....	67
<b>3.4.3</b>	Regenerated Production.....	70
<b>3.4.4</b>	$f$ -ratios in the eastern Arabian Sea during Feb.-March 2004	71
<b>3.5</b>	Chlorophyll- $\alpha$ , nutrients and physical parameters during December-2004 in the northwestern Arabian Sea...	72
<b>3.5.1</b>	Chlorophyll- $\alpha$ .....	72
<b>3.5.2</b>	Nutrients.....	74
<b>3.5.3</b>	Hydrographic conditions.....	76
<b>3.6</b>	$^{15}\text{N}$ based Productivity study during the early winter monsoon (December 2004).....	78
<b>3.6.1</b>	Total Production.....	78
<b>3.6.2</b>	New Production.....	79
<b>3.6.3</b>	Regenerated Production.....	81
<b>3.6.4</b>	$f$ -ratio during December-2004.....	82
<b>3.7</b>	Effect of winter cooling on the $f$ -ratio.....	84
<b>3.8</b>	Export flux in the Arabian Sea during the winter monsoon..	85
<b>3.9</b>	Conclusions.....	86

## **Chapter 4 The Equatorial and Southern Indian Ocean**

**89-128**

<b>4.1</b>	Introduction.....	90
<b>4.2</b>	Physical parameters, Chlorophyll-a and nutrients in the equatorial Indian Ocean during pre-monsoon season 2005.....	92
<b>4.2.1</b>	Hydrographic Conditions.....	92
<b>4.2.2</b>	Nutrients.....	93
<b>4.3</b>	$^{15}\text{N}$ based productivity studies in the equatorial Indian Ocean during pre-monsoon 2005.....	96
<b>4.3.1</b>	Total Production.....	96
<b>4.3.2</b>	New Production.....	98
<b>4.3.3</b>	Regenerated production.....	100
<b>4.3.4</b>	$f$ -ratios in the equatorial Indian Ocean.....	103
<b>4.4</b>	Southern Ocean.....	104
<b>4.5</b>	Summary of the earlier work.....	108
<b>4.6</b>	Chlorophyll-a, nutrients and physical parameters during Feb-March 2006 in the southern Indian Ocean.....	110
<b>4.6.1</b>	Chlorophyll-a.....	110
<b>4.6.2</b>	Nutrients.....	112
<b>4.6.3</b>	Hydrographic Conditions.....	113
<b>4.7</b>	$^{15}\text{N}$ based productivity during late austral summer 2006.....	114
<b>4.7.1</b>	Total production.....	114
<b>4.7.2</b>	New Production.....	117
<b>4.7.3</b>	Regenerated Production.....	119
<b>4.7.4</b>	$f$ -ratios in the Southern Ocean.....	120
<b>4.8</b>	Iron Experiment.....	122
<b>4.9</b>	Conclusions.....	126

## **Chapter 5 Conclusions and Scope for Future Work**

**129-134**

<b>5.1</b>	The northeastern Arabian Sea.....	130
<b>5.2</b>	The equatorial Indian Ocean.....	132
<b>5.3</b>	The southern Indian Ocean.....	133
<b>5.4</b>	Scope for future work.....	134
