

**Measurement of Electron Scattering  
Cross Sections of Molecules  
at Low Energies**

Thesis submitted to

*The Gujarat University*

for the Degree of

*Doctor of Philosophy*

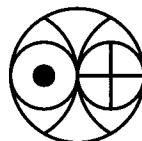

in

*Physics*

by

Prashant Rawat

*May 1998*

PHYSICAL RESEARCH LABORATORY  
NAVRANGPURA, AHMEDABAD 380 009

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Scattering cross sections . . . . .	1
1.1.1	Units . . . . .	4
1.2	Interactions contributing to electron scattering . . . . .	5
1.3	Basic Scattering Channels . . . . .	5
1.4	Resonances . . . . .	8
1.5	Theory of electron-molecule collisions . . . . .	12
1.5.1	Method of partial waves . . . . .	17
1.5.2	Theories lowest order in the interaction potential . . . . .	18
1.5.2.1	Born and Born type models . . . . .	19
1.5.2.2	Eikonal ( Glauber ) approximations . . . . .	21
1.5.2.3	Impact parameter method . . . . .	22

1.5.3 Close-coupling theory . . . . .	23
1.5.4 Distorted wave approximations . . . . .	24
1.5.5 Sudden approximations . . . . .	25
1.6 Experimental techniques for cross section measurement . . . . .	26
1.6.1 Transmission method . . . . .	27
1.6.2 Recoil method . . . . .	30
1.6.3 Time-of-flight (TOF) type transmission method . . . . .	31
1.7 Comparison of different experimental techniques . . . . .	33
1.8 Present technique . . . . .	34
1.9 Advantages of a photoelectron source over conventional electron sources in scattering experiments . . . . .	35
1.10 Choice of target gases . . . . .	37
<b>2 Experimental Set up</b>	<b>39</b>
2.1 VUV Light Source . . . . .	41
2.2 Beam Monitor Assembly . . . . .	43
2.2.1 Thin Film Aluminum Filter . . . . .	46
2.3 Ionization, Scattering and Accelerating Regions and Production of Electrons . . . . .	48

2.3.1 Ionization and Scattering Regions . . . . .	48
2.3.2 Accelerating Region . . . . .	51
2.3.3 Production of photoelectrons . . . . .	52
2.4 Electron Energy Analysers . . . . .	53
2.4.1 Design of CMA . . . . .	57
2.4.2 Analyser details . . . . .	60
2.4.3 Magnetic field shielding . . . . .	61
2.4.4 Effects of contact potentials . . . . .	62
2.5 Electron detector . . . . .	63
2.5.1 Channel Electron Multiplier . . . . .	64
2.6 The Data acquisition system . . . . .	66
2.7 Operation of spectrometer . . . . .	68
2.8 Scattering by target molecules . . . . .	69
2.8.1 When source and target gases are different . . . . .	70
2.8.2 When the source and the target gases are the same . .	71
2.9 Vacuum system . . . . .	72
2.10 Pressure measurement . . . . .	75

<b>3 Calculation of scattering cross sections</b>	<b>78</b>
3.1 When the source and the target gas are different . . . . .	79
3.2 When source and target gas are the same . . . . .	83
<b>4 Error analysis</b>	<b>87</b>
4.1 Pressure measurement . . . . .	88
4.1.1 Gauge calibration . . . . .	88
4.1.2 Reference pressure . . . . .	89
4.1.3 Drift in null reading of the gauge . . . . .	89
4.2 Scattering path length . . . . .	89
4.3 Thermal transpiration . . . . .	90
4.4 Counting statistics . . . . .	91
4.5 Forward scattering . . . . .	92
4.6 Multiple scattering . . . . .	96
4.7 Scattering in accelerating region . . . . .	97
4.8 Gas impurity . . . . .	97
4.9 Scattering due to ions . . . . .	98
4.10 Uncertainty in incident electron energy . . . . .	98

4.11 Total errors . . . . .	99
<b>5 Results and discussion</b>	<b>100</b>
5.1 Carbon Dioxide . . . . .	100
5.2 Carbon monoxide . . . . .	110
5.3 Nitrous oxide . . . . .	119
5.4 Nitrous oxide versus Carbon monoxide . . . . .	126
<b>6 Conclusions and scope for future work</b>	<b>128</b>
6.1 Conclusions . . . . .	128
6.2 Scope for future work . . . . .	131
