ISOTOPIC STUDIES OF THE EARLY SOLAR SYSTEM OBJECTS IN METEORITES BY AN ION MICROPROBE

A THESIS SUBMITTED
TO
GUJARAT UNIVERSITY
FOR
THE DEGREE OF DOCTOR OF PHILOSOPHY
IN PHYSICS

पुस्तकालय THE LIBRARY
भौतिक अनुसंधान प्रयोगशाला
PHYSICAL RESEARCH LABORATORY
नवरांगपुरा, અમદાવાદ-380009.
NAVRANGPURA, AHMEDABAD-380009.
ભારત/INDIA

Contents

Acknowledgements	iv
List of Figures	vi
List of Tables	x
1 Introduction	1
1.1 Isotopic Anomalies and Early Solar System Phases	2
1.2 Short-lived Nuclides in the Early Solar System	5
1.3 ^{41}Ca and ^{26}Al as Chronometers of Early Solar System Processes	7
1.4 Source(s) of Short-lived Nuclides Present in the Early Solar System	10
1.4.1 Nucleosynthetic origin of short-lived nuclides	13
1.4.2 Cosmogenic origin	17
1.5 ^{26}Al as a Heat Source of Planetesimals in the Early Solar System	19
1.6 The Aim of the Present Study	23
2 Experimental Techniques	26
2.1 Introduction	26
2.2 Secondary Ion Mass Spectrometer (SIMS)	27
2.2.1 Primary ion column	28
2.2.2 Production of secondary ions	31
2.2.3 Secondary ion optics and mass spectrometer	32
2.2.4 Detection system	35

2.3	Isotopic Analysis and Mass Fractionation	36
2.4	Sample Preparation and Isotopic Measurements by Ion Microprobe	39
2.4.1	Magnesium isotopic measurement	40
2.4.2	Potassium isotopic measurements	43
3	Sample Description	55
3.1	Refractory phases and inclusions	56
3.1.1	Allende CAIs	56
3.1.2	Murchison (CM) Hibonites	60
3.1.3	Efremovka CAIs	64
3.2	Igneous Objects from Chondrites	67
4	Results	74
4.1	Potassium Isotopic Composition	74
4.1.1	Refractory phases in Efremovka (CV3) meteorite	74
4.1.2	CAIs from the Allende (CV3) meteorite	83
4.2	Potassium and Magnesium Isotopic Composition in Hibonites	86
4.2.1	Efremovka hibonites (E50)	86
4.2.2	Murchison (CM) Hibonites	88
4.2.3	Allende (CV3) hibonite (USNM 3529-42)	91
4.3	Magnesium Isotopic data for Igneous Objects from Chondrites	94
5	Source(s) of Short-lived Nuclides in the Early Solar System and Time Scales	98
5.1	Distribution of ^{41}Ca and ^{26}Al in the Early Solar System	100
5.2	Source(s) of the Short-lived Nuclides, ^{26}Al and ^{41}Ca in the Early Solar System	103
5.2.1	"Fossil" origin of the short-lived nuclides in the early solar system	105
5.2.2	Production of ^{41}Ca and ^{26}Al by energetic particle irradiation	107
5.3	Extinct Radionuclides and Time Scales of Early Solar System Processes	120

6 Heat Source for Early Thermal Processing of Meteorite Parent Bodies: The case for ^{26}Al	127
6.1 Heating of Meteorite Parent Bodies by ^{26}Al : Numerical Estimates	128
6.2 ^{26}Al as a Heat Source: Meteoritic Evidence	133
7 Summary and Conclusions	138
7.1 Scope of future work	141
