

PLASMA INSTABILITIES AND THE DYNAMICS OF THE
EQUATORIAL F-REGION

A THESIS
SUBMITTED FOR THE
DEGREE OF DOCTOR OF PHILOSOPHY
OF THE
GUJARAT UNIVERSITY

BY

RAMANATHAN SEKAR
(R. SEKAR)

JANUARY 1990

Chapter 1

Introduction

1.1	Nomenclature	..	1
1.2	Thermosphere	..	2
1.3	Thermospheric Composition	..	3
1.4	Thermospheric Winds and Temperature	..	4
1.5	Low latitude Thermospheric Dynamics	..	5
1.6	Numerical Models	..	8
1.7	F-region of the Ionosphere	..	9
1.8	F-region Electric Fields	..	14
1.9	Theory of Electric Fields	..	18
1.10	F-region Electron Densities	..	19
1.11	Plasma Instabilities	..	20
1.12	Geomagnetic Storm and its effects over the low latitude F region		
a)	Characteristics of Geomagnetic Storms	..	22
b)	Effects of Magnetic Storms at low latitudes	..	23
c)	Effects on Plasma densities	..	24
d)	Effects on neutral composition	..	25
e)	On neutral temperature	..	26
f)	On neutral winds	..	26

	g)	On electric fields	..	26
1.3		Equatorial Spread-F	..	28
	a)	ESF Varieties	..	31
	b)	Characteristics of Irregularities	..	31
	c)	Plasma bubble and its characteristics	..	32
	d)	Generation Mechanism of ESF	..	33
	e)	Numerical simulation studies	..	34
	f)	Importance of E region during Spread-F	..	35
	g)	Association of ESF with Equatorial Ionisation Anomaly	..	37
	h)	Effects of ESF	..	38
	i)	Artificial Spread-F	..	40
	j)	Physical Picture of Natural ESF	..	41
	k)	Present study	..	42
	l)	Scope of the present thesis	..	43

Chapter 2

3.7 Techniques of measurements of neutral and plasma parameters

2.1	Neutral parameters by artificial vapour clouds	..	46
2.2	Vapour releases in the present study	..	48
2.3	Analysis Procedure for blob releases	..	50
2.4	Determination of vertical velocities	..	53
2.5	Analysis procedure for trail releases	..	54

2.6	Determination of Molecular Diffusion	..	55
2.7	Neutral Temperature from Diffusion Profile	..	58
2.8	Temperature Measurements by a Fabry-Perot Spectrometer	..	60
2.9	Measurements of electric fields from Ba-Sr releases	..	61
2.10	Measurements of Electron density by Langmuir probe	..	65
2.11	Ion-Mass Spectrometer	..	68

Chapter 3

Quiet-time Measurements on Neutral and Plasma Parameters at the onset of ESF

3.1	Measurements on neutral winds	..	72
3.2	Electron density Measurements	..	77
3.3	Ionosonde data	..	79
3.4	Results of plasma drifts and electric fields	..	80
3.5	Measurements on the altitude profile of plasma motion	..	85
3.6	Discussion	..	87
3.7	Possible Mechanism for the existence of spatial gradient in electric field	..	88
3.8	Conclusion	..	92

Chapter 4

Linear Theories of Plasma Instabilities in the F-region of the Ionosphere

4.1	Physical Mechanism of Plasma Instabilities		
6.1 a)	Collisional Rayleigh-Taylor Instability	..	94

	b) <u>E</u> x <u>B</u> Instability	..	97
	c) Zonal wind driven instability	..	100
4.2	Role of Vertical winds in the Rayleigh-Taylor Mode	..	102
4.3	Discussion	..	109
4.4	Quantitative estimation of growth rates	..	112
4.5	Conclusion	..	116

Chapter 5 **Study of Nonlinear thoery of equatorial spread-F by numerical simulation**

5.1	Introduction	..	118
5.2	Historical Background	..	118
5.3	Results obtained by earlier workers	..	120
5.4	The Present numerical study	..	126
5.5	Theory	..	128
5.6	Region of simulation and boundary conditions	..	133
5.7	Inputs to the model	..	134
5.8	Numerical methods	..	135
5.9	Numerical Results and discussion	..	136
5.10	Case Study on the effects of advection	..	147
5.11	Conclusion	..	152

Chapter 6 **Measurements during a geomagnetically disturbed period**

6.1	Introduction	..	153
-----	--------------	----	-----

6.2	Experimental details and Results	..	154
6.3	Neutral winds	..	155
6.4	Diffusion Results	..	157
6.5	Neutral temperature measurements	..	160
6.6	Turbopause level	..	164
6.7	Measurement on Electron density	..	166
6.8	Discussion on the F region plasma densities during disturbed day	..	167
6.9	Discussion on the occurrence of spread-F	..	172
6.10	E region stratification	..	173
6.11	Conclusion	..	179
	Scope of Future work	..	180
	Appendix 1	..	A1-1
	Appendix 2	..	A2-1
	References	..	R1
