Momentum Spectroscopic Studies of Atomic and Molecular Ionisation

A THESIS

submitted for the Award of Ph. D. degree of

MOHANLAL SUKHADIA UNIVERSITY

in the

Faculty of Science

by

Vandana Sharma

Under the Supervision of

Bhas Bapat, Reader, Physical Research Laboratory, Ahmedabad

DEPARTMENT OF PHYSICS

FACULTY OF SCIENCE

MOHANLAL SUKHADIA UNIVERSITY

UDAIPUR

Year of submission: 2007

Contents

Certificate	vi
Declaration	vii
Abstract	1
1 An overview	2
1.1 Probing at the atomic scale	2
1.2 Electron-molecule collisions	3
1.3 Birth of Momentum Spectroscopy	6
1.4 Motivation and outline of the work	9
2 The Ion Momentum Spectrometer	11
2.1 Requirements	11
2.2 The experimental set-up	12
2.2.1 Collision geometry	12
2.2.2 Extraction of reaction products	13
2.2.3 Electron detector	15
2.2.4 Ion imaging detector	16
2.3 Optimisation of spectrometer performance	20
2.3.1 Projectile-target overlap	20
2.3.2 Signal processing	22
2.4 List Mode Data Acquisition	24
2.5 Building the ion momentum vector	27
2.6 Test results	29

3 Multi particle coincidence and momentum maps	33
3.1 Multi-ion coincidence	34
3.2 Coincidence momentum maps	36
3.3 Information from TOF coincidences	37
3.3.1 Dissociation channels	37
3.3.2 Lifetime of metastable ions	39
3.4 Information from full momentum maps	40
3.4.1 Geometry estimation	41
3.4.2 Energy levels	43
3.5 Need for quantum chemical calculations	45
4 Fragmentation of a linear triatomic : CO₂	46
4.1 Break-up channels	47
4.2 Two body break-up	47
4.2.1 Lifetime of metastable CO ₂ ²⁺	49
4.2.2 Potential energy surface of molecular ion	50
4.3 Three-body break-up	51
4.3.1 Geometry of dissociating molecular ion	53
4.4 Considerations for polyatomics	57
5 Fragmentation of symmetric polyatomics : CCl₄, SF₆	58
5.1 Stability patterns in molecular ion fragments	59
5.2 Migration of atoms during dissociation	65
5.3 Alteration in geometry	66
5.4 Effects due to asymmetry	73
6 Site specific dissociation: C₂H₅OH	74
6.1 Tools of trade: Isotopic substitution	75
6.2 Identification of fragment ions	76
6.2.1 Ions not requiring rearrangement of bonds	78
6.2.2 Ions requiring rearrangement of bonds	79
6.3 Decay channels of C ₂ H ₅ OH ²⁺	83

6.3.1	Preferred channels	85
6.3.2	Electronic energy levels	85
6.3.3	Open questions	86
7	Summary and future direction	88
7.1	Summary of the present work	88
7.2	A view into the future	90
	Bibliography	92
	Publications	101
	Acknowledgements	104
