

Neutrino Masses And Leptogenesis

A THESIS

submitted for the Award of Ph. D. degree of

MOHANLAL SUKHADIA UNIVERSITY

in the

Faculty of Science

by

Santosh Kumar Singh

Under the Supervision of

**Prof. Utpal Sarkar,
Physical Research Laboratory, Ahmedabad**

**DEPARTMENT OF PHYSICS
FACULTY OF SCIENCE**

MOHANLAL SUKHADIA UNIVERSITY

UDAIPUR

Year of submission: 2009

Contents

Acknowledgment	i
Abstract	iii
Publications	viii
List of tables	ix
List of figures	x
1 Introduction	1
I Neutrino masses and CP invariants	5
2 Standard Model and fermion masses	6
2.1 The model	7
2.2 Spontaneous symmetry breaking	9
2.3 Fermion masses and mixing	11
3 Neutrino masses and mixing	15
3.1 Neutrino masses: Dirac and Majorana	15
3.2 Neutrino mixing	17
3.3 Neutrino oscillations and evidences	20
3.3.1 Solar neutrinos	21
3.3.2 Atmospheric neutrinos	22
3.3.3 Reactor neutrinos	23
3.3.4 Accelerator neutrinos	24
3.3.5 Global fit of neutrino oscillation data	25
3.4 Direct detection of neutrino masses	26
3.4.1 Beta decay	26
3.4.2 Neutrinoless double beta decay	27

4 CP violation in neutrino mass matrix	29
4.1 CP violation in the quark sector	30
4.2 CP violation in the leptonic sector	30
4.3 Rephasing invariants with neutrino masses	32
4.4 CP violation in lepton number conserving processes	35
4.5 Texture zeroes	38
4.6 Application to texture two-zero mass matrices	39
5 Seesaw mechanism of neutrino masses	43
5.1 Type I seesaw	44
5.2 Type II seesaw	46
5.3 Type III seesaw	47
5.3.1 Type III seesaw with fermionic triplet	47
5.3.2 Type III seesaw with fermionic singlet	49
5.4 Seesaw mechanism in left-right symmetric model	49
5.4.1 Left-right type (I+II) seesaw realization	52
5.4.2 Left-right type III seesaw realization	53
6 Grand unified theories and neutrino masses	55
6.1 SU(5) GUTs	57
6.1.1 Spontaneous symmetry breaking	57
6.1.2 Gauge coupling unification	59
6.1.3 Neutrino masses	60
6.2 SO(10) GUTs	64
6.2.1 Symmetry breaking pattern	65
6.2.2 Yukawa sector and neutrino masses	67
II Neutrinos and astroparticle	72
7 Standard cosmology	73
7.1 FRW cosmology	74
7.2 Thermodynamics of the early universe	77
7.3 Brief thermal history of the universe	80
8 Dark energy	83
8.1 Observational evidences	83
8.2 Problem with cosmological constant	85
8.2.1 Finetunning problem	85
8.2.2 Cosmic Coincidence problem	86
8.3 Varying DE models	87

8.3.1	Quintessence models	87
8.3.2	Neutrino models of DE	89
9	Baryon asymmetry through lepton asymmetry	92
9.1	Baryogenesis	94
9.1.1	Sakharov's conditions	94
9.1.2	Connecting baryon and lepton asymmetry	95
9.1.3	Mechanism for baryogenesis	97
	Electroweak baryogenesis	97
	GUT baryogenesis	98
	Baryogenesis via leptogenesis	98
9.2	Leptogenesis	99
9.2.1	CP asymmetry	101
9.2.2	Basic leptogenesis mechanism	102
9.2.3	Lower bound on M_1	106
10	Connecting leptogenesis to low energy CP violation	108
10.1	Type I seesaw and parameter counting	109
10.2	Parametrization of $M_{\nu D}$ in two right-handed neutrino models	113
10.3	Neutrino masses and mixings in two right-handed neutrino models .	114
10.4	Leptogenesis in two right-handed neutrino models	118
10.5	CP violation in leptogenesis and neutrino oscillation	120
10.6	CP violation in leptogenesis and neutrinoless double-beta decay .	122
11	Neutrino dark energy in SO(10) GUT model	126
11.1	Left-right symmetric model for NDE	127
11.2	Potential minimization	128
11.3	Embedding the model in $SO(10)$ GUT	132
11.4	Gauge coupling evolution	134
11.5	Yukawa sector and neutrino masses	140
11.6	Dark energy in the model	146
12	Conclusion	148
	Bibliography	151
