# Investigation in the low latitude daytime mesosphere lower thermosphere region

*Thesis submitted to*

D. A. V. V., University of Indore

*For the degree of*

**Doctor of Philosophy**

In

**Physics**

By: Alok Khivraj Taori

March 2001

Thesis Supervisor: Prof. R. Sridharan  
Physical Research Laboratory, Ahmedabad  
Space Physics Laboratory, VSSC, Trivandrum

Thesis Co-Supervisor: Dr. A. K. Dutta  
D. A. V. V., Indore.

Physical Research Laboratory  
Navrangpura, Ahmedabad – 380 009

# **CONTENTS:**

<b>1. Introduction:</b>	<b>1</b>
1.1# Structure of the atmosphere	3
1.2# Upper atmospheric phenomena over low and equatorial latitudes	5
1.2.1 Equatorial electrojet	5
1.2.2 Counter electrojet	7
1.2.3 Equatorial ionization anomaly	8
1.2.4 Neutral anomaly	9
1.2.5 Equatorial temperature and wind anomaly	9
1.2.6 Midnight temperature maximum	11
1.2.7 Equatorial spread F	12
1.3# Middle and upper atmosphere coupling	15
1.4# Upper atmospheric effects of gravity waves and tides	17
1.5# The present work	17
<b>2. Instrumentation:</b>	<b>19</b>
2.1# Introduction to the dayglow investigations in the past	19
2.2# Dayglow photometer (DGP)	24
2.2.1 Instrumental details	25
Interference filter	25
Fabry Perot etalon	26
Mask system	28
Photomultiplier tube	30
2.2.2 Setting the DGP for the operation	30
2.2.3 Critical evaluation of the DGP	32
2.2.4 Effect of spectral smoothening on the solar background	34
2.3# Day-Night photometer (DNP)	37
Modification of DGP into DNP	37

2.3.1 Data analysis procedure	38
2.4# Multiwavelength daytime photometer (MWDPM)	40
2.4.1 Interference filter	41
2.4.2 Fabry Perot etalon	41
2.4.3 Mask system	41
2.4.4 Functional details of the MWDPM	43
2.4.5 Critical evaluation of the MWDPM	45
<b>3. Emission processes responsible for the OH, O(<sup>1</sup>S) and O(<sup>1</sup>D) dayglow emission</b>	<b>48</b>
3.1# Hydroxyl Meinel band, mesospheric emission	48
3.2# O( <sup>1</sup> S) 557.7nm green line, lower thermospheric emission	55
3.3# O( <sup>1</sup> D) 630.0nm red line, thermospheric emission	59
3.4# Results from low latitudes on 557.7 and 630.0nm emission variabilities	63
3.4.1 Examples of the observed variabilities	64
3.4.2 Discussion	70
3.5 # Conclusions	72
<b>4. Day- Night measurements of OI 630.0nm airglow emission from low latitudes</b>	<b>73</b>
4.1# Introduction	73
4.2# Present investigation	78
Airglow observation and corresponding ionospheric data	78
4.3# Results and discussion	82
4.3.1 F region behavior during daytime	82
4.3.2 Persistance of specific periodicities in the TIS	85
4.4# Conclusions	88

<b>5. Daytime mesopause OH rotational temperature: estimation and variabilities</b>	<b>90</b>
5.1# Wave filtering processes	91
5.2# Measurement methods	93
5.2.1 Estimation of OH rotational temperatures and Earlier studies on OH rotational temperatures	94
5.2.2 First results on daytime OH rotational temperatures from equatorial latitudes	100
5.2.3 Temperature estimation by WINDII instrument onboard the UARS satellite	101
5.2.4 Mesospheric wind data	103
5.3# Further results on mesopause temperatures	104
5.4# Results from a low latitude station	107
5.5# Discussion	109
5.6# Conclusion	113
 <b>6. Optical investigations of the daytime equatorial electrodynamical processes</b>	 <b>114</b>
6.1# E region dynamo	114
6.2# Daytime equatorial electrodynamical processes	117
6.3# Use of 630.0m emission for the study of electrodynamical processes	121
6.4# Response of 630.0nm emission to the electrodynamical processes: Results from Kolhapur	123
6.5# Electrodynamical coupling of the E and F region over dip equator: an investigation	129

## **7. Effects of space weather related processes on thermospheric OI**

<b>630.0nm</b>	<b>140</b>
7.1# Introduction	140
7.2# Solar wind interaction with the earth's magnetosphere	140
7.3# 6 <sup>th</sup> January 1997 space weather event	143
7.4# Results from a low latitude station, Mt. Abu during 6 <sup>th</sup> January 1997 space weather event	146
7.5# Results from another low latitude station, Kolhapur	154
7.6# Conclusions	159
<b>8. Scope of future work</b>	<b>160</b>
<b>9. References</b>	<b>164</b>
