PLASMA MAGNETOSPHERE AROUND COMPACT OBJECTS

S.C. TRIPATHY

PHYSICAL RESEARCH LABORATORY
AHMEDABAD
INDIA

A THESIS
SUBMITTED TO THE GUJARAT UNIVERSITY
FOR THE DEGREE OF
DOCTOR OF PHILOSOPHY

JUNE 1991

Contents

| | |
|---|------|
| Acknowledgements | v |
| Research Publications | vii |
| Abstract | viii |
| 1 INTRODUCTION | 1 |
| 1.1 Preliminaries | 3 |
| 1.1.1 Spherical accretion | 6 |
| 1.1.2 Disc accretion | 7 |
| 1.2 Why magnetospheric models ? | 7 |
| 1.3 Importance of general relativity and magnetic field | 9 |
| 1.4 Historical perspective | 11 |
| 1.5 Survey of models | 13 |
| 1.5.1 Disc Accretion | 14 |
| 1.5.2 Thin Disc | 16 |
| 1.5.3 Thick disc | 22 |
| 1.6 Plasma instabilities in the accretion disc | 25 |
| 1.7 Aim and scope of the thesis | 27 |

| | |
|--|-----------|
| 2 MATHEMATICAL FORMULATION | 29 |
| 2.1 Dynamics of magnetofluid in relativistic formalism | 29 |
| 2.2 Equations of structure | 29 |
| 2.3 Equations governing general perturbation | 38 |
| 3 EQUILIBRIUM STRUCTURE FOR A PLASMA MAGNETO- SPHERE AROUND COMPACT OBJECTS | 46 |
| 3.1 Introduction | 46 |
| 3.2 Dynamical equations | 49 |
| 3.2.1 Geometry | 49 |
| 3.3 Possible solutions | 52 |
| 3.4 Thin disc | 53 |
| 3.4.1 Free fall velocity | 54 |
| 3.4.2 Relativistic Keplerian distribution | 55 |
| 3.4.3 Keplerian distribution | 56 |
| 3.5 Thick Disc | 57 |
| 3.5.1 Free fall velocity | 57 |
| 3.5.2 Relativistic Keplerian distribution | 58 |
| 3.5.3 Keplerian distribution | 59 |
| 3.6 Discussions and conclusions | 60 |
| 4 ACCRETING MAGNETOFLUID AROUND A COMPACT OB- JECT: A NEWTONIAN ANALYSIS | 63 |
| 4.1 Introduction | 63 |
| 4.2 Formalism | 65 |

| | | |
|----------|---|-----------|
| 4.3 | Possible structure | 69 |
| 4.4 | Special cases | 70 |
| 4.4.1 | Thin disc | 70 |
| 4.4.1.1 | Boundary conditions | 71 |
| 4.4.2 | Thick disk | 73 |
| 4.5 | Global properties of the thick disc | 75 |
| 4.5.1 | Magnetic field structure | 75 |
| 4.5.2 | Pressure distribution | 76 |
| 4.5.3 | Accretion rate and angular momentum | 78 |
| 4.5.4 | Energetics | 79 |
| 4.6 | Conclusion | 80 |
| 5 | PLASMA INSTABILITY AT THE INNER EDGE OF THE ACCRETION DISC | 82 |
| 5.1 | Introduction | 82 |
| 5.2 | Linearised equations | 86 |
| 5.3 | A general formulation for stability analysis | 89 |
| 5.4 | One dimensional perturbation analysis | 91 |
| 5.4.1 | Local analysis | 91 |
| 5.4.2 | Analytical results | 91 |
| 5.4.2.1 | Kelvin-Helmholtz mode | 94 |
| 5.4.2.2 | Magnetosonic mode | 96 |
| 5.4.3 | Numerical results | 97 |
| 5.4.4 | Discussion | 97 |
| 5.5 | Eigenvalue techniques | 98 |
| 5.5.1 | Comparison of results | 99 |

| | | |
|---------------------|---|------------|
| 5.6 | Two dimensional perturbation analysis | 100 |
| 5.6.1 | Results and discussions | 100 |
| 5.6.2 | Non-local analysis | 103 |
| 5.7 | Conclusion | 104 |
| 6 | CONCLUDING REMARKS AND OPEN PROBLEMS | 108 |
| APPENDIX A | | 113 |
| APPENDIX B | | 114 |
| APPENDIX C | | 115 |
| Bibliography | | 116 |
