

Mass independent isotopic enrichment in ozone and its transfer to other molecules through exchange

A thesis submitted to

Gujarat University

for the degree of

Doctor of Philosophy in Physics

By

Antra

Planetary and Geosciences Division
PHYSICAL RESEARCH LABORATORY,
AHMEDABAD - 380 009, INDIA

March, 2007

CERTIFICATE

I hereby declare that the work presented in this thesis is original and has not formed the basis for the award of any degree or diploma by any University or Institution.

Abstract	ix
1 Introduction	1
1.1 Basic definitions	2
1.2 Causes for isotopic fractionation	3
1.3 Mass dependent fractionation	4
1.3.1 Kinetic isotope effect	4
1.3.2 Equilibrium isotope effect	5
1.4 Anomalous or mass independent fractionation	5
1.4.1 Examples of Anomalous isotope effect	6
1.5 Anomalous isotope effect in Ozone	7
1.5.1 Atmospheric ozone and laboratory produced ozone	8
1.5.2 Rate coefficients of isotope specific ozone formation channels	10
1.6 Theoretical developments	13
1.7 Motivation for Thesis	17
2 Experimental Technique	20
2.1 Isotope Ratio Mass Spectrometry (IRMS)	20
2.1.1 Principle	20
2.1.2 Mathematical representation of isotope separation	22
2.2 Ozone preparation	22
2.2.1 Ozone made by Tesla discharge and UV photolysis	22
2.3 Analysis of oxygen isotopes in ozone	23
2.4 Analysis of oxygen and carbon isotopes in CO ₂	26

2.4.1	Experimental set up for CO ₂ -CeO ₂ exchange	28
2.5	Separation of ozone and CO ₂ mixture	29
3	Photochemical simulation model (KINTECUS)	31
3.1	Brief description of the model	31
3.1.1	Model description or reaction spreadsheet	32
3.1.2	Species spreadsheet	32
3.1.3	Parameter Spreadsheet	33
3.2	Performance test of the model	34
3.2.1	Experimental detail	34
3.2.2	Input parameters for the model	35
3.2.3	Simulation result and determination of dissociation rate constant (k ₁)	41
4	Anomalous enrichment of heavy oxygen isotopes in CO₂ produced from O+CO reaction	46
4.1	Motivation	46
4.2	Experimental details	50
4.2.1	Preparation of ozone by Tesla (Set 1: constant O ₃ composition and Set 2: variable O ₃ composition) and by UV (Set 3)	50
4.2.2	Photolysis of (O ₃ +CO) mixture by visible light (Set 1-3)	52
4.2.3	Photolysis of (O ₂ +CO) mixture by UV light (Set 4)	52
4.2.4	Measurement of δ ¹⁸ O, δ ¹⁷ O and δ ¹³ C of the product CO ₂	56
4.3	Results and Discussion	56
4.3.1	Oxygen isotope fractionation	56
4.3.2	Carbon isotope fractionation	60
4.3.3	Preliminary analysis by considering exchange and collision	62
4.4	Model Simulation	65
4.4.1	Input parameters for visible light dissociation of ozone in (O ₃ +CO) mixture (Sets 1-3)	65
4.4.2	Determination of enhancement factor 'f' for [M] to obtain correct CO ₂ amount and its significance	68
4.4.3	Input parameters for UV dissociation of (O ₂ +CO) mixture (Set 4)	70
4.4.4	Initial concentration of the reactant species	74
4.5	Simulation Results and Discussion	76
4.5.1	Oxygen isotope enrichment	76
4.5.2	Carbon isotope fractionation	77
4.6	Simulation of earlier O+CO experimental data	78
4.7	Implications	81

4.7.1	Comparison of enrichments in CO ₂ and O ₃	83
4.8	Investigation of effect of nuclear spin on O+CO reaction	84
4.9	Conclusion	84
5	Determination of intramolecular isotope distribution of ozone	86
5.1	Motivation	86
5.2	Experimental details	90
5.3	Results and Discussion	92
5.3.1	Calculation of δ_a , δ_s and r^{49}	99
5.3.2	Calculation based on published rate constant values	107
5.4	Application to atmospheric studies	111
5.5	Conclusion	113
6	Effect of nuclear spin in exchange of ¹⁷O in CO₂- O(¹D) system: Model calculation of Laboratory data.	114
6.1	Motivation	114
6.2	Laboratory experiment	118
6.3	Model Input	118
6.4	Model Result and Discussion	124
6.5	Nuclear spin effect on chemical reaction	130
6.6	Proposed mechanism	134
6.7	Conclusion	135
Summary and Scope for Future Work		136
Appendix		141
A.1	Calculation of (¹⁸ O and ¹⁷ O) exchange rate in reaction of O with O ₂ and CO	141
A.2	Fractionation associated with catalytic decomposition of ozone by silver oxide	145
A.3	Estimation of the values of r^{50} and r^{49} from known reaction rates	149
A.4	Estimation of total error in r^{49} value	151
