

**STUDIES OF TROPICAL AND MONSOON
CIRCULATIONS AND THEIR VARIABILITY
USING AN ATMOSPHERIC GENERAL
CIRCULATION MODEL**

A Thesis Submitted to
Gujarat University
for
THE DEGREE OF DOCTOR OF PHILOSOPHY
in MATHEMATICS

by

BIJU THOMAS

DEPARTMENT OF MATHEMATICS
GUJARAT UNIVERSITY
AHMEDABAD 380 009

January 1998

Contents

Acknowledgments	iv
1. Introduction	1
1.1 Climate and climate modelling	1
1.2 Asiatic monsoon and Walker circulation	3
1.2.1 Asian summer monsoon circulation	3
1.2.2 Walker circulation, Southern Oscillation and El Niño	5
1.2.3 Interannual variability of Asian monsoon circulation	8
1.3 Plan and Scope of the Thesis	16
1.3.1 General Circulation Model	17
1.3.2 Simulation of winter and summer climates	19
1.3.3 Sensitivity of Asian summer monsoon and tropical circulations to 1987 and 1988 SST anomalies	19
1.3.4 The role of SST anomalies on the winter-spring time circulation anomalies associated with the interannual variability of Asian summer monsoon	21
1.3.5 AGCM Simulation of Surface Winds in the Tropical Pacific during 1979-1988	22
2. Development of an atmospheric general circulation model (AGCM)	23
2.1 Introduction	23
2.2 Model Dynamics	24
2.2.1 Governing Equations	24
2.2.2 Spectral expansions	27
2.2.3 The Spectral Transform Method	28
2.2.4 Semi-implicit scheme	30
2.3 Physical Processes	30
2.3.1 Radiation	30
2.3.2 Convection and Condensation	34
2.3.3 Dry adjustment scheme	36
2.3.4 Vertical and horizontal diffusion	37

2.3.5	Surface Values and climatological data	40
2.3.6	Topography	41
2.4	Concluding remarks	41
3.	Simulation of winter and summer climates with PRL Atmospheric General Circulation Model	43
3.1	Introduction	43
3.2	The model and Integration	45
3.3	Results and Discussion	45
3.3.1	Time series of global means	45
3.3.2	Zonal Mean Fields	48
3.3.3	Geographical Distribution	58
3.3.4	Temporal variability	67
3.4	Conclusions	71
4.	Sensitivity of Asian summer monsoon and tropical circulations to 1987 and 1988 sea surface temperature anomalies	74
4.1	Introduction	74
4.2	SST anomalies, OLR anomalies and atmospheric heating of 1987 and 1988	79
4.3	The model and the experiments	82
4.4	Results of Experiment 1	84
4.4.1	Velocity potential	84
4.4.2	Horizontal wind	87
4.4.3	Precipitation rate	91
4.5	Results of Experiments 2, 3 and 4	95
4.6	Discussions and conclusions	98
5.	The role of SST anomalies on the winter-spring time circulation anomalies associated with the interannual variability of Asian summer monsoon	107
5.1	Introduction	107
5.2	Winter-spring time precursory signals of Asian summer monsoon .	112

5.3	Interannual variation of seasonal mean circulations	123
5.3.1	Time mean fields and standard deviations	123
5.3.2	Hovmoller maps	130
5.3.3	EOF analysis	135
5.3.4	One-point correlation analysis	136
5.3.5	SST-deep convection relationship	138
5.4	Numerical simulations of precursory signals associated with the interannual variability of Asian summer monsoon	142
5.5	Concluding remarks	147
6.	AGCM Simulation of Surface Winds in the Tropical Pacific during 1979-1988	151
6.1	Introduction	151
6.2	The model and the experiment	153
6.3	The Time Series of Southern Oscillation Index (SOI), SST and Rainfall Anomalies	155
6.4	Lag-correlations	156
6.5	The annual cycle	158
6.6	Low-frequency interannual variability	167
6.6.1	Hovmoller maps	167
6.6.2	EOF analysis	170
6.7	Simulation of zonal surface winds with a simple linear Gill-type model	182
6.8	Concluding remarks	187
7.	Summary, Conclusions and Future Directions	191
7.1	Summary and conclusions	191
7.2	Future directions	195
