

# ANOMALOUS FRACTIONATION OF OXYGEN ISOTOPES IN PHOTOCHEMICAL REACTIONS

A THESIS SUBMITTED TO  
GUJARAT UNIVERSITY  
AHMEDABAD

FOR  
THE DEGREE OF  
**DOCTOR OF PHILOSOPHY IN**  
**PHYSICS**

By

**SUBRATA CHAKRABORTY**

PHYSICAL RESEARCH LABORATORY  
*Navrangpura, Ahmedabad*  
*India 380 009*

November 2002

# CONTENTS

---

<b>CHAPTER I: INTRODUCTION</b>	<b>1 – 16</b>
4.1 Isotopic Fractionation	2
1.1.1 Mass Independent Isotopic Fractionation	3
1.1.2 The Early Solar System	4
1.1.3 Earth and Other Planetary Atmosphere	4
1.1.4 Laboratory Observations	5
1.1.5 Accurate Expressions of Isotopic Fractionation	5
1.2 Objective of the Present Study	6
1.3 Ozone Formation Mechanism	8
1.3.1 Isotopic Enrichment in Ozone	9
1.3.2 Relative Rate Coefficient of Different Ozone Formation Channels	9
1.3.3 Non-RRKM Based Model	10
1.3.3.1 Non-Statistical $\eta$ -Effect	12
1.3.3.2 Weak Collisions for Deactivation	13
1.3.3.3 Partitioning Effect in Dissociation Channels	13
1.3.4 Interlink Between RRKM Based Theory and Rate Constants	14
1.4 Isotopic Measurements of Stratospheric Ozone	14
1.4.1 Spectroscopic (Optical) Measurements	15
1.5 Scope of the Present Thesis	16
 <b>CHAPTER II: OZONE FORMATION: PRESSURE DEPENDENCE</b>	 <b>17 – 36</b>
4.1 Introduction	18
2.1.1 Laboratory Experiments	18
2.1.2 Motivation Behind the Present Experiment	19
2.2 About the Experiment	20
2.2.1 Experimental Configuration	20
2.2.2 Experimental Procedure	21
2.3 Results	23
2.4 Discussion	27
2.4.1 Pressure Dependence in Range I and Gao-Marcus	

Theory	27
2.4.2 Significant Effect of Secondary Processes in Enrichment	28
2.4.3 Experimental Results of UCSD	29
2.4.4 Dissociation Effect in the Pressure Range II	31
2.4.5 Enrichment in Range III	33
2.4.6 Effect of Nitrogen in the System	33
2.4.7 Amount Dependence in Enrichment of Ozone	33
2.5 Conclusion	36

### ***CHAPTER III: OZONE DISSOCIATION: PHOTO-DISSOCIATION***

<b><i>AND SURFACE INDUCED DISSOCIATION</i></b>	<b><i>37 – 64</i></b>
3.1 Introduction	38
3.3 Part A: Photo-Dissociation of Ozone	38
3.3.1 Motivation	38
3.3.2 Experimental Procedure	39
3.3.3 Results	40
3.3.4 Discussion	47
3.2.4.1 Photo-induced Kinetic Isotope Effect	47
3.2.4.2 Photo-Dissociation in the Hartley Band	49
3.2.4.3 Photo-Dissociation in the Chappuis Band	49
3.2.4.4 Mass Independent Isotopic Fractionation During Photo-Dissociation in Hartley Band	50
3.2.4.5 Source of Mass Independent Isotopic Fractionation in Hartley Band Photo-Dissociation	52
3.2.4.6 Non-RRKM Effect During O <sub>3</sub> <sup>*</sup> Dissociation	53
3.2.5 Conclusion of Photo-Dissociation Study	55
3.3 Part B: Surface Induced Dissociation of Ozone	56
3.3.1 Motivation	56
3.3.2 Experimental Procedure	56
3.3.3 Results	58
3.3.4 Discussion	61
3.3.5 Conclusion of Surface Induced Dissociation Study	63

**CHAPTER IV: ISOTOPIC EXCHANGE: CO<sub>2</sub> – O(<sup>1</sup>D)** **65 – 91**

4.1	Introduction	66
4.1.1	Anomalous Oxygen Isotopic Composition of Stratospheric CO <sub>2</sub>	66
4.1.2	Mechanism of the Isotopic Exchange Between CO <sub>2</sub> and O( <sup>1</sup> D)	66
4.1.3	Previous Experimental Studies	68
4.1.4	Numerical Model Studies	69
4.1.5	Motivation Behind the Present Work	70
4.2	About the Experiment	71
4.2.1	Preparation of O <sub>3</sub> of Fixed Isotopic Composition	71
4.2.2	Preparation of CO <sub>2</sub> and O <sub>3</sub> of Different Isotopic Compositions	72
4.2.3	CO <sub>2</sub> – O( <sup>1</sup> D) Isotopic Exchange	72
4.2.4	Isotopic Measurement of Oxygen and CO <sub>2</sub>	73
4.2.5	Test of Recovery Yield of CO <sub>2</sub> and Blank δ <sup>13</sup> C	75
4.3	Results	75
4.4	Discussion	80
4.4.1	Isotopic Composition of O( <sup>1</sup> D)	80
4.4.2	Failure of Two-Component Mixing	81
4.4.3	Previous Results in the Light of Present Experiment	83
4.4.4	Supportive Evidence for Preferential <sup>17</sup> O Transfer	85
4.4.5	Results of Set II Experiments: Connection to the Stratosphere	85
4.4.6	Preferential <sup>17</sup> O Transfer to CO <sub>2</sub>	87
4.4.7	A Simple Box Model Calculation	89
4.5	Conclusion	91

**CHAPTER V: STRATOSPHERIC IMPLICATIONS AND FUTURE DIRECTION** **92 – 108**

4.1	Introduction	93
5.2	Stratospheric Implications	93
5.2.1	Isotopic Enrichment Profile (Δδ <sup>18</sup> O) of Stratospheric	

Ozone	96
5.2.2 Altitudinal Variation: Previous Explanation and Present Proposition	97
5.2.3 Application of Altitudinal Variation of Isotopic Enrichment in $^{18}\text{O}$	100
5.2.4 Altitudinal Variation in Slope of $\Delta\delta^{17}\text{O} - \Delta\delta^{18}\text{O}$ Correlation Plot	100
5.3 Oxygen Isotopic Composition of Stratospheric $\text{CO}_2$	101
5.4 Role of $\text{O}(^1\text{D})$ in the Stratosphere	103
5.4.1 Isotopic Composition of $\text{O}(^1\text{D})$	104
5.4.2 Interaction of $\text{O}(^1\text{D})$ With Other Oxygen Bearing Molecules	106
5.4.3 Importance of $\text{CO}_2 - \text{O}(^1\text{D})$ Exchange	106
5.5 Future Laboratory Studies	107
<b><i>EPILOGUE</i></b>	<b><i>109</i></b>
<b><i>BIBLIOGRAPHY</i></b>	<b><i>111</i></b>
<b><i>APPENDIX</i></b>	<b><i>118</i></b>
<b><i>LIST OF PUBLICATIONS</i></b>	<b><i>123</i></b>
