

Ozone and Related Gases in the Lower Atmosphere

A THESIS

submitted for the Award of Ph. D. degree of

Mohan Lal Sukhadia University, Udaipur, India

in the

Faculty of Science

BY

Lokesh Kumar Sahu

Under the Supervision of

Prof. Shyam Lal

SPACE AND ATMOSPHERIC SCIENCES DIVISION
PHYSICAL RESEARCH LABORATORY, AHMEDABAD

MOHANLAL SUKHADIA UNIVERSITY, UDAIPUR

Year of submission: 2004

CHAPTER 1: <i>Introduction</i>	1
1.1 Ozone in the troposphere	2
1.1.1 <i>Photochemical production of O₃</i>	2
1.1.2 <i>Transport of O₃ from the stratosphere</i>	3
1.1.3 <i>Photochemical loss of O₃</i>	4
1.1.4 <i>Dry deposition at Earth's surface</i>	4
1.1.5 <i>Tropospheric budget of O₃</i>	5
1.1.6 <i>Effects of O₃ exposure to plants, vegetation and human health</i>	6
1.2 Carbon monoxide in the atmosphere	8
1.3 Methane in the atmosphere	9
1.4 Non-methane hydrocarbons in the Atmosphere	10
1.4.1 <i>Sources of NMHCs</i>	11
1.4.2 <i>Sinks of NMHCs</i>	12
1.4.3 <i>Budget of NMHCs</i>	13
1.4.4 <i>Reactivity with respect to O₃ formation</i>	15
1.5 Reactive nitrogen compounds (NO _x) in the atmosphere	17
1.6 Atmospheric processes and their roles	18
1.6.1 <i>Boundary layer and meteorology</i>	18
1.6.2 <i>Photochemistry</i>	20
1.6.3 <i>Transport</i>	20
1.6.3.1 <i>Advection</i>	21
1.6.3.2 <i>Convection</i>	21
1.7 Usage of NMHCs measurements	23
1.7.1 <i>Tracer of atmospheric transport</i>	24
1.7.2 <i>Seasonal trends and photochemical removal</i>	25
1.7.3 <i>Age of air parcel</i>	26
1.7.4 <i>Effects of dilution</i>	26
1.8 Objectives and chapter details of the thesis work	27

CHAPTER 2: Instruments and Experimental Methods	29
2.1 Measurements of ozone in the atmosphere	29
2.1.1 Principle of operation	30
2.1.2 UV photometer	31
2.1.3 Sample handling system	33
2.1.4 Calibration of ozone	33
2.2 Measurements of hydrocarbons in the atmosphere	33
2.2.1 Present methods for NMHCs analysis	34
2.2.2 Measurement of NMHCs using GC techniques	35
2.2.3 Methods for C ₂ -C ₅ NMHCs analyses at PRL	37
2.2.4 Calibration of NMHCs	39
2.3 GC techniques for CH ₄ and CO analyses	40
2.4 Measurements of UVB and total solar flux	41
2.5 MOZAIC Instrumentation for O ₃ and relative humidity measurements	41
 CHAPTER 3: Distributions of Trace Gases at Ahmedabad and Mt. Abu	 43
3.1 Distributions of O ₃ , CO, CH ₄ , and C ₂ -C ₅ NMHCs at Ahmedabad	45
3.1.1 Description of the site, experiments and general meteorology	45
3.1.2 Diurnal variations of C ₂ -C ₅ NMHCs	48
3.1.3 Diurnal variations of CH ₄ and CO	50
3.1.4 Seasonal variations of C ₂ -C ₅ NMHCs	52
3.1.5 Interspecies correlation of NMHCs species	55
3.1.6 Correlation of CO versus NMHCs	57
3.1.7 Diurnal variation of O ₃	58
3.1.8 Solar UVB radiation flux	59
3.1.9 Seasonal variations of O ₃ , precursors and solar radiation fluxes	62
3.2 Distributions of C ₂ -C ₄ NMHCs at Mt. Abu	64
3.2.1 Description of the site, experiments and general meteorology	64
3.2.2 Diurnal variations of C ₂ -C ₄ NMHCs	65
3.2.3 Seasonal variations of C ₂ -C ₄ NMHCs	66
3.2.4 Comparison of seasonal variations at Mt. Abu and other remote sites	69
3.2.5 Interspecies correlation of NMHCs species at Mt. Abu	71
3.3 Comparison of measurements at Ahmedabad and Mt. Abu	73
3.4 Abundance of individual C ₂ -C ₄ NMHCs	74

CHAPTER 4: <i>Distributions of O₃, CO and Hydrocarbons over the Bay of Bengal</i>	75
4.1 Experimental details	76
4.2 Field expedition during 14 September to 12 October 2002 (BOBPS) over the Bay of Bengal	77
4.2.1 <i>Meteorological conditions</i>	77
4.2.2 <i>Variations in O₃ along the cruise track</i>	78
4.2.3 <i>Variations in CO along the cruise track</i>	86
4.2.4 <i>Variations in CH₄ along the cruise track</i>	86
4.2.5 <i>Variations in NMHCs along the cruise track</i>	87
4.2.6 <i>Latitudinal variations of NMHCs</i>	90
4.2.7 <i>Correlation among various trace gases</i>	91
4.2.8 <i>C₂H₂/CO ratio a tracer for the "age" of the air mass</i>	94
4.2.9 <i>Back trajectory analyses for some special events</i>	95
4.3 Field expedition during 19-28 February 2003 (BOBEX II) over the Bay of Bengal	97
4.3.1 <i>Variations in O₃ along the cruise track</i>	98
4.3.2 <i>Variations in CH₄ and CO along the cruise track</i>	99
4.3.3 <i>Variations in C₂-C₄ NMHCs along the cruise track</i>	100
4.3.4 <i>Discussion</i>	102
4.3.5 <i>Air masses observed during DOY 49.5-51</i>	104
4.3.6 <i>Air masses observed during DOY 51-52</i>	104
4.3.7 <i>Air masses observed during DOY 52-55</i>	106
4.3.8 <i>Air masses observed during DOY 55-57 and 57-58</i>	108
4.3.9 <i>Comparison of measurements over the Bay of Bengal</i>	109
4.4 Comparison with previous measurements	111
 CHAPTER 5: <i>Study of O₃ and Water Vapor Distributions over Madras and Delhi</i>	 113
5.1 Tropical tropospheric O ₃	115
5.2 The MOZAIC Program	116
5.2.1 <i>Scientific Objectives</i>	116
5.2.2 <i>MOZAIC measurements over India</i>	116
5.3 Variability in wind fields over India	118

5.4	Vertical distribution of O ₃ in the tropics	120
5.5	Annual variations in O ₃ , water vapor and temperature over Madras during 1996-1998	125
5.5.1	<i>Variability over Madras during 1996</i>	125
5.5.2	<i>Variability over Madras during 1997 and 1998</i>	126
5.6	Annual variations in O ₃ and water vapor over Delhi during 1996 and 1998	129
5.6.1	<i>Variability over Delhi during 1996</i>	129
5.6.2	<i>Variability over Delhi during 1998</i>	131
5.7	Average seasonal variations of O ₃ , relative humidity and temperature over Madras during 1996-2001	131
5.8	Average seasonal variations of O ₃ , relative humidity and temperature over Delhi during 1996-2001	134
5.9	Case study analysis using individual profile	136
5.9.1	<i>Profiles over Madras</i>	137
5.9.2	<i>Profiles over Delhi</i>	142
 CHAPTER 6: Summary and Future Scopes		 148
6.1	Trace gases at Ahmedabad and Mt. Abu	148
6.2	Trace gases over the Bay of Bengal	150
6.3	Vertical distributions of O ₃ and water vapor over Madras and Delhi	153
6.4	Future outlook	155
