

# **ISOTOPE GEOCHEMISTRY OF SIWALIK SEDIMENTS AND SIGNATURE OF PAST CLIMATE CHANGE**

**PRASANTA SANYAL**

**Ph.D. Thesis  
December, 2004**

**Physical Research Laboratory  
Ahmedabad-380 009, India**

# **ISOTOPE GEOCHEMISTRY OF SIWALIK SEDIMENTS AND SIGNATURE OF PAST CLIMATE CHANGE**

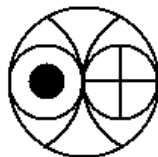

Submitted to  
*The Maharaja Sayajirao University of Baroda*  
*Vadodara, India*

**By**

**Prasanta Sanyal**

**For the degree of**  
**Doctor of Philosophy in Geology**

**December, 2004**

**Planetary and Geosciences Division**  
**Physical Research Laboratory**  
**Navrangpura, Ahmedabad-380009, India**

## **Certificate**

*I hereby declare that the work presented in this thesis is original and has not formed the basis for the award of any degree or diploma by any university or institution.*

**Prasanta Sanyal** (author)

## **Certified by**

**Dr. S.K. Gupta** (Guide)  
Planetary and Geosciences Division  
Physical Research Laboratory  
Ahmedabad-380 009, India

**Prof. P.P.Patel** (Co-guide)  
Department of Geology  
M.S. University of Baroda  
Vadodara-390 002, India

## CONTENTS

<b>Chapter-1</b>	<b>Introduction</b>	<b>1-12</b>
1.1	Introduction	2
1.2	Previous studies from Siwalik	4
1.3	Causes of vegetational change	6
1.4	Motivation of present work	9
1.5	Objectives of present study	10
1.6	Out line of the thesis	11
<b>Chapter-2</b>	<b>Geology, materials and methods</b>	<b>13-43</b>
2.1	Introduction	14
2.1.1	Siwalik Basin	15
2.2	Age of the Siwalik Strata	15
2.2.1	Sampling in different sections and age of samples	18
2.2.1a	Sampling in Siwalik sections	18
2.2.1b	Sampling in Gondwana sections	19
2.3	Sedimentological attributes of Siwalik	20
2.3a	Sedimentology of Kangra Sub-basin	20
2.3b	Sedimentology of Mohand Rao section	22
2.3c	Sedimentology of Haripur Khol section	23
2.3d	Sedimentology of Surai Khola section	24
2.4	Palaeosol Facies	27
2.4a	Palaeosol facies of Kangra Sub-basin	27
2.4b	Palaeosol facies of Mohand Rao section	30
2.4c	Palaeosol facies of Haripur Khol section	30
2.5	Gondwana Supergroup	31
2.5a	Denwa Formation	32
2.5b	Bagra Formation	32
2.5c	Age of Denwa and Bagra Formation	33
2.6	Materials and Method	34

2.6.1	Analysis of soil carbonate nodules	34
2.6.2	Analysis of sandstone nodules	34
2.7	Experimental Techniques	34
2.7.1	Carbon and oxygen isotope ratio of carbonate	34
2.7.2	Carbon isotope ratio of organic matter	37
2.7.3	Hydrogen isotope ratio of pedogenic Clay minerals	38
2.7.3a	Dissolution of calcium carbonate from nodules	38
2.7.3b	CBD treatment in clay	38
2.7.3c	Production of hydrogen from pedogenic Clay	38
2.7.4	Stable isotope ratio measurement	39
2.7.4a	Reproducibility of standards and inter-laboratory comparison for CO <sub>2</sub>	40
2.7.5	Calibration of isotope data	43
<b>Chapter-3</b>	<b>Signature of monsoon variation and vegetational change in Siwalik</b>	<b>44-65</b>
3.1	Introduction	45
3.2	Results	46
3.3	Discussion	47
3.3.1	Information on vegetation change from carbon isotope ratio of soil carbonate and associated organic matter	47
3.3.2	Relationship between $\delta^{13}\text{C}$ values of soil carbonate and soil organic matter	51
3.3.3	Supporting evidence of growing season change in Haripur Khol	56
3.4	Oxygen isotope ratios of soil carbonate	57
3.4a	Source of scatter in data	57
3.4b	Implication of $\delta^{18}\text{O}$ variation	58
3.5	Comparison of monsoon evolution with other proxies	60
3.6	Causes of C <sub>4</sub> plant appearance	63
3.7	Conclusions	64

<b>Chapter-4 Palaeovegetational reconstruction based on early diagenetic carbonate cement of sandstone nodules</b>	<b>66-83</b>
4.1 Introduction	67
4.2 Evidences for early diagenetic character of the cement	68
4.3 Mudstone facies with concretions in Mohand Rao Section	68
4.4 Results	68
4.5 Discussion	70
4.5.1 Carbon isotope ratio of soil carbonate and early diagenetic carbonate cement of sandstone	70
4.5.2 Comparison between $\delta^{13}\text{C}$ of early diagenetic carbonate and soil carbonate	77
4.5.3 Oxygen isotope ratio of soil carbonate and early cement of sandstone diagenetic carbonate	77
4.6 Timing and nature of change in vegetation in various section of Pakistan and India	81
4.7 Conclusions	83
<b>Chapter-5 Monsoon variation from hydrogen isotope ratio of pedogenic clay minerals</b>	<b>84-98</b>
5.1 Introduction	85
5.2 Structure of Clay minerals	86
5.3 Identification of clays	87
5.4 Results	88
5.5 Discussion	88
5.5.1 Pedogenic origin of Clays	88
5.5.2 Pristine character of hydrogen isotope ratio	91
5.5.3 Hydrogen isotope ratio of pedogenic clays	92
5.5.4 Supportive evidence of climate change during last 6 Ma	95
5.5.4.1 Proxies from Haripur Khol section	95
5.5.4.2 Marine proxies in support of deduced climate change for Siwalik soils	96
5.6 Conclusions	98

<b>Chapter-6</b>	<b>Carbon and oxygen isotope ratio of soil carbonates from Gondwana and Siwalik: Implications to atmospheric CO<sub>2</sub>, vegetation and rainfall</b>	<b>99-118</b>
6.1	Introduction	100
6.2	Soil carbonate from Denwa and Bagra Formation and Ranital section	101
6.3	Identification of top surface of soil profile	102
6.4	Results	103
6.5	Discussion	108
6.5.1	Comparison between carbon isotope ratio of soil carbonates from Siwalik and Gondwana	108
6.5.2	Estimation of atmospheric CO <sub>2</sub>	112
6.5.3	Oxygen isotope ratio of soil carbonate	115
6.6	Conclusions	117
<b>Chapter-7</b>	<b>Diagenesis of Siwalik sediments and its effect on stable isotopes</b>	<b>119-136</b>
7.1	Introduction	120
7.2	Cement morphology of sandstone	121
7.3	Isotopic Results	121
7.4	Discussion	121
7.4.1	Oxygen isotope ratio of carbonate cement	121
7.5	Carbon isotope ratio of carbonate cement of sandstone	132
7.6	Clay mineral assemblage in sandstone	133
7.7	Conclusions	136
<b>Chapter-8</b>	<b>Conclusions and future studies</b>	<b>137-144</b>
8.1	Conclusions	138
8.2	Future Studies	141
8.2a	Reconstruction of relative abundance of C <sub>3</sub> and C <sub>4</sub> grasses	141
8.2b	Sr isotope ratio in soil carbonate	143
8.2c	Ar-Ar dating of ash bed	143
