

Subluminal and Superluminal Propagation of Electromagnetic Fields

A THESIS

**submitted for the Award of Ph.D. degree of
Mohan Lal Sukhadia University**

**in the
Faculty of Science**

**BY
Tarak Nath Dey**

**Under the Supervision of
Prof. G.S. Agarwal**

**QUANTUM OPTICS & QUANTUM INFORMATION DIVISION
PHYSICAL RESEARCH LABORATORY, AHMEDABAD**

MOHANLAL SUKHADIA UNIVERSITY, UDAIPUR

Year of submission: 2004

Contents

Acknowledgement	vi
Abstract	viii
1 Introduction	1
1.1 Basic Propagation Equation	2
1.2 Interaction of Radiation with Matter	7
1.3 Induced Atomic Coherences in Two Level Atomic Systems	10
1.4 Control of Susceptibility in Multilevel Systems	15
1.5 Group Velocity and its Kinematics	19
1.6 Subluminal Pulse Propagation	22
1.7 Storage and Retrieval of Light Pulses	25
1.8 Superluminal Pulse Propagation	27
2 From Subluminal to Superluminal Propagation	31
2.1 Model System and Its Basic Equations	32
2.2 Numerical Results and Discussion	34
2.3 Distortion Free Superluminal Pulse Propagation	37
2.4 Doppler Effect on Group Index Calculation	39
2.5 Kinematics of Superluminal Light	41
2.6 Summary	43
3 Storage and Retrieval of Light Pulses	44
3.1 Dynamics of Pulse Propagation	45
3.2 Numerical Simulations	47
3.2.1 Pulse Propagation: Effect of Nonlinearities	47
3.2.2 Storage and Retrieval of Electromagnetic Fields at Moderate Powers	48

3.2.3	Storage and Retrieval of Information on Modulating Signal	54
3.2.4	Dynamical Evolution of the Control Field	55
3.2.5	Nonadiabatic Results	55
3.3	Adiabaton Theory and Its Relation to Light Storage	57
3.4	Summary	59
4	Subluminal and Superluminal Propagation of Intense Pulses at Room Temperature Solid	60
4.1	Saturated Absorption	61
4.2	Model Description and Dynamical Equations	61
4.3	Numerical Results on Ultra-slow Pulse Propagation	64
4.4	Comparison between Two and Three Level Model for Ruby	66
4.5	Reverse Saturated Absorption	68
4.6	Superluminal Pulse Propagation in Alexandrite	69
4.7	Summary	72
5	Saturated Absorption for Production of Slow Light in Doppler-Broadened Two Level Systems	73
5.1	Basic Equation for Driven Two Level System	73
5.2	Saturation Absorption Spectroscopy and Lamb Dip	77
5.3	Susceptibilities $\chi(\omega)$ of the Doppler Broadened Medium	78
5.4	Pulse Propagation and Verification	80
5.5	Summary	83
6	Stoppage of Light in Hot Atomic Gases	84
6.1	Group Velocity and Spatial Dispersive Hot Atomic Medium	85
6.2	Model Configuration and Its Basic Equations	86
6.3	Numerical Results on Stoppage of Light	89
6.4	Summary	92
	Conclusions and Future Outlook	93
	Appendix	96
	References	97
	List of Publications	108
