

## Treasure Hunt Competition organized on the occasion of Republic Day at Udaipur Solar Observatory / Physical Research Laboratory, Udaipur

On the occasion of 74<sup>th</sup> Republic Day, a treasure hunt competition was organized for all the permanent employees and their family members, research scholars, postdoctoral fellows and trainees at Udaipur Solar Observatory/Physical Research Laboratory, Udaipur under the Azadi ka Amrit Mahotsav.

Under this program all the participants were divided into various groups (teams). In order to maintain balance in the selection of teams in the program, equal number of staff members and family members, research scholars / postdoctoral fellows and trainees were placed in each team so that all team members have equal participation in understanding and recognizing technical and common clues or words.

Different clues were given to each team. Each clue was interconnected in such a way that solving the first clue could lead to the second clue. Along with each clue, some food items and other souvenirs were kept for entertainment of team members during the competition while at the same time their curiosity can be maintained.

At the end of the program, after finding all the clues, each team had to reach the canteen where refreshments were arranged. The first three (3) teams to reach the canteen after finding all the clues were declared as the first, second and third winners respectively according to the time taken by them and their prizes will be awarded during any event organized in the future.

In this way the program was completed and all the participants participated enthusiastically in it.
