

ATMOSPHERIC STRUCTURE :
EXPLORATION OVER ANTARCTICA
AND INTERHEMISPHERIC COMPARISON

THESIS

Submitted to the
GUJARAT UNIVERSITY
for the degree of
DOCTOR OF PHILOSOPHY
(Science)

by

PARMJIT SINGH SEHRA

DEDICATED TO

MY PARENTS

Shri Mohinder Singh Sehra

and

Shrimati Satwinder Kaur

who induced into me a great inspiration and
cultivated a keen interest for
scientific adventures and
exploratory work

C E R T I F I C A T E

I hereby declare that the work presented in this thesis 'Atmospheric Structure : Exploration over Antarctica and Interhemispheric Comparison' is original and has not formed the basis for the award of any degree or diploma by any University or Institution.

P. R. Pisharoty

(Guide & Professor-in-charge)

Greatly indebted to

Prof. P. R. Pisharoty

(for stimulating guidance, helpful discussions, kind encouragement, magnanimity, valuable advice and constant inspiration during all phases of this work)!

Prof. B. D. Bhavsar and the late Prof. Vikram A. Sarabhai
(for providing an opportunity of exploring the South Polar Ice-Cap under a joint agreement between the Indian Space Research Organisation, Government of India and the Hydrometeorological Service of the USSR)!

Prof. K. R. Ramanathan, Prof. Devendra Lal

Prof. Yash Pal and Prof. Satish Dhawan

(for ever helpful attitude and providing all necessary facilities).

Members of the Soviet Antarctic Expedition, 1971-73

(for scientific collaboration and kind co-operation)!

Shri R. Sadanandan for typing the manuscript neatly and all others who helped me directly or indirectly in this work.

PARMJIT SINGH SEHRA

Statement	i - vi
 <u>CHAPTER - I</u>		
<u>INTRODUCTION</u>	1 - 34
1.1	General	1
1.2	Various techniques of sounding the atmosphere	3
1.3	Present State of knowledge	7
1.3.1	Earlier studies of the atmospheric structure	7
1.3.2	Synoptic studies in the Northern Hemisphere	10
1.3.3	Synoptic studies in the Southern Hemisphere	11
1.3.4	Transient and standing eddies	14
1.3.5	Diurnal variations	15
1.3.6	Seasonal variations	18
1.3.7	Quasi-biennial oscillation	22
1.3.8	Stratospheric warmings	25
1.3.9	Dependence on Solar activity	29

1.4	Indo-Soviet collaboration and author's contribution	31
	Papers published	33

CHAPTER - II

	<u>THE M-100 METEOROLOGICAL ROCKET SOUNDING SYSTEM</u>			35-62
2.1	The 'RKZ-2' radiosonde		35
2.1.1	Temperature sensor		36
2.1.2	Humidity sensor		37
2.1.3	Baroswitch	37
2.1.4	Radio unit	38
2.1.5	Sources of error		39
2.2	The M-100 rocket sounding system		41
2.2.1	Launching of M-100 rocket		42
2.2.2	Rocket payload		43
2.2.3	Wind measuring sensors		47
2.2.4	Temperature transmitters		48
2.2.5	Temperature sensors calibration		50
2.2.6	The M-100 radiotelemetry system	..		54
2.2.7	The M-100 radar system		57
2.2.8	The M-100 power supply unit		59
2.2.9	General Remarks		61

CHAPTER - III

	<u>M-100 ROCKETSONDE DATA REDUCTION AND PROCESSING</u>	63-99
3.1	Radiosonde data reduction	63
3.2	Meteor radar data reduction	64
3.3	Telemetry data reduction	66
3.3.1	Timing the film	67
3.3.2	Deciphering the signals	67
3.3.3	Converting the telemetered signals into atmospheric parameters	71
3.3.3.1	Correcting the graduated curves	71
3.3.3.2	Plotting graduated bar graph	72
3.3.3.3	Voltages conversion and plotting with typewriter	73
3.4	Computer processing of the data	75
3.5	Computing wind velocity and direction	76
3.6	Error in wind determination	78
3.7	Correction of wind errors	82
3.8	Computing the atmospheric temperature	84
3.9	Computing the atmospheric pressure and density	98

CHAPTER - IV

<u>EXPLORATION OF ATMOSPHERIC STRUCTURE OVER</u>			
<u>ANTARCTICA</u>			100-153
4.1	Soviet Antarctic Expedition	102
4.2	Some physical characteristics of Antarctic Meteorology	104
4.3	Tropospheric and stratospheric winds over Antarctica	121
4.3.1	Zonal winds	..	128
4.3.2	Meridional winds	130
4.3.3	Tropospheric and stratospheric circulation Indices (TCI, SCI)	132
4.4	Upper mesospheric wind structure in Antarctica		135
4.4.1	Upper mesospheric zonal winds	...	138
4.4.2	Upper mesospheric meridional winds		139
4.4.3	Mesospheric Circulation Index (MsCI)		140
4.5	Seasonal wind variations over Antarctica		141
4.5.1	Seasonal zonal wind variations		144
4.5.2	Seasonal meridional wind variations		146
4.5.3	Seasonal wind persistence	147
4.6	Comparison with the Groves Atmospheric Model		149
4.7	Discussion of results	151

CHAPTER - VATMOSPHERIC TEMPERATURE, PRESSURE AND DENSITYVARIATIONS IN ANTARCTICA 154-185

5.1	Seasonal variations of atmospheric temperature over Antarctica	154
5.1.1	Tropospheric temperatures	155
5.1.2	Stratospheric temperatures	156
5.1.3	Mesospheric temperatures	158
5.1.4	Antarctic tropopause, stratopause and mesopause	159
5.1.5	Temperature departures from the annual mean	160
5.1.6	Temperature lapse rates	164
5.2	Warmings and Coolings of the Antarctic stratosphere and mesosphere	166
5.2.1	Atmospheric temperature disruption	166
5.2.2	Horizontal temperature gradients	167
5.2.3	Upper atmospheric warmings and coolings	170
5.2.4	Discussion of results	174
5.3	Atmospheric pressure and density variations	177

CHAPTER - VI

<u>STUDY OF EQUATORIAL ATMOSPHERIC STRUCTURE</u>		186-208
6.1	Equatorial circulation pattern	187
6.2	Berson westerly winds !.....	189
6.3	Strato-mesospheric circulation !.!.!.!	191
6.4	Relation with the tropospheric circulation	196
6.5	Equatorial tropopause, stratopause and mesopause !..... !....	199
6.6	Sudden mesospheric warming over equatorial region !..... !.....	204

CHAPTER - VII

<u>SOUTH POLAR AND EQUATORIAL ATMOSPHERIC STRUCTURE</u>		
<u>COMPARISON</u> !..... !....		209-244
7.1	Antarctic and equatorial atmospheric structure in southern summer !..... !....	209
7.1.1	Zonal winds !..... !....	211
7.1.2	Meridional winds !....	214
7.1.3	Atmospheric temperatures !....	216
7.2	Summer profiles comparison with Groves Model	219
7.2.1	Zonal wind departures !....	219
7.2.2	Temperature departures !.!.!	221

CHAPTER - VII

7.3	Atmospheric circulation indices in southern summer	223
7.3.1	Tropospheric Circulation Index (TCI)	226
7.3.2	Stratospheric Circulation Index (SCI)	228
7.3.3	Mesospheric Circulation Index (MsCI)	229
7.4	Antarctic and equatorial atmospheric structure in southern winter	230
7.4.1	Zonal winds	230
7.4.2	Meridional winds	232
7.4.3	Atmospheric temperature	234
7.5	Typical temperature profiles comparison	236
7.6	Discussion and interpretation of results	237

CHAPTER - VIIIINTERHEMISPHERIC COMPARISON OF ATMOSPHERICSTRUCTURE

		245-266
8.1	Atmospheric structure over Heiss Island	246
8.2	Atmospheric structure over Volgograd	248
8.3	Antarctic-Arctic atmospheric structure	249
8.4	Eastern-Western hemispheric atmospheric structure	253
8.4.1	Hemispheric zonal flow	258
8.4.2	Hemispheric temperature variations	261
8.4.3	Upper atmospheric warmings and coolings	263
8.5	Epilogue	266
